This advanced course, aims to deepen your understanding of electric vehicle design and other related ideas while also bringing you up to speed on the basics.

The purpose of this course is to develop the next generation of EV designers who will advance the field of vehicle design.

Contents:

- Basics of electromobility and steering dynamics.
- EV powertrain architecture.
- Wire harnessing (EMI, EMC).
- Understanding of SOC, cell balancing
- Designing of R-C model in MATLAB
- Speed control methods
- Power converters and invertery.
- Battery modelling
- Design and simulation of AC and DC charge controller
- Battery deterioration analysis
- SoH estimation
- SoP and SoF estimation

About Program:

The Martian Program is on-campus Internship program offered by Persistent Systems for AY 2022-23 batch and through Martian Program students can also get PPO/full time roles at Persistent.

An assessment was taken for selection in Program.

Online Test: This was the initial step for selection in the program and this step examines you in Aptitude, Logical reasoning and Computer Science fundamentals. Along with MCQs there were 2 coding questions.

This internship was of 7-week and in every week, we were trained on different topics such as DBMS, Computer Networks, Operating System and DSA. Also, they train us in a Programming Language.
At the end of each week there was an MCQ assessment on the topic you got the trained.

Final Assessment: This final assessment consists of MCQ on the topic that were taught in previous 7 weeks.
After training of all 7 weeks there was a final assessment based on which we had the chance to get PPO.

Total 37 students have completed internship of which 18 students were called for final interview and 3 has got offer.

Rest of the students have got Internship certificate.

- Students practiced creating a simple static webpage.

Day 2: Front end Development:

- Day two focused on front-end development.
- Students delved deeper into HTML and CSS, learning about page structure, styling, and responsive design.
- They created interactive web elements using JavaScript.
- A hands-on project involved designing a personal webpage.

Day 3: Database Development (Database Management):

- The program transitioned into back-end development.
- Students were introduced to server-side programming languages such as Node.js and Python.
- Basic server operations like handling requests and responding with data were explained.
- A practical exercise involved setting up a simple server and serving a webpage dynamically.

Day 4: Databases and Data Management:

- Day four was dedicated to databases and data management.
- Students learned about relational databases, SQL, and NoSQL databases.
- They explored database design, creating tables, and performing CRUD operations.
- A project required students to build a database-driven web application.

Day 5: Full Stack Development and Deployment:

- The final day of the program focused on bringing everything together.
- Students worked on integrating their front-end and back-end components.
- They learned about APIs and how to make AJAX requests from the client-side.
- Deployment strategies were discussed, and students deployed their web applications to cloud services or hosting platforms.

After every there is Question answer session. After day 5 session Mr. Pachpande give the task to student and evaluate the session Performance.

The Program ended with vote of thanks.

Outcome:

- Participant understand both front-end and back-end development technologies, tools, and best practices.

Session Outcome:

Participants in the Microsoft Excel course have completed a comprehensive 30-hour training program. They have gained a strong foundation in Excel basics, advanced data manipulation techniques, data analysis, and advanced functions. Additionally, they have learned to create charts, graphs, and pivot tables, design dashboards, and work with macros and VBA for automation. The course concluded with a project presentation and assessment to ensure a deep understanding of the topics covered.

This course has been conducted successfully by Prof. B. T. Husain, an internal resource person from the Department of Business Administration and Research. The participants have acquired valuable skills that will enhance their proficiency in Microsoft Excel, allowing them to apply their knowledge in various academic and professional settings.

Certifications were be awarded to participants upon successful completion of the course

2. To build confidence and foster a positive attitude toward learning.

3. To develop deeper understanding of complex topics through hands-on or experiential learning.

4. To utilize multi-sensory activities to enhance understanding and retention.

5. To promote collaboration, communication, and critical thinking.

6. To help learners to become independent thinkers and problem solvers.

7. To provide learners with the tools to become lifelong learners.

Outcomes of ALDP Program

After successful completion of course student will be able to

1. Increase Productivity: Accelerated learning and development can help students become more productive in their future job roles. This can result in a more efficient workflow and improved quality of work.

2. Improve Job Satisfaction: Accelerated learning and development can help students feel more satisfied with their roles, as they have the opportunity to develop new skills. This can lead to improved job satisfaction, as well as greater job security.

3. Increase Retention Rates: College that offer accelerated learning and development programs can enrich higher retention attitude in students, as students are more likely to stay with a company that invests in their professional development.

4. Enhance Problem Solving Skills: With accelerated learning and development, students can develop more advanced problem solving skills and improve their ability to think critically. This can help students identify and resolve issues more quickly, resulting in greater efficiency.

5. Improved Efficiency: Accelerated learning and development can help students to become more efficient in their role, as they are able to gain the skills they need to complete their tasks more quickly and effectively.

Session on - Emerging HR Landscape, Challenges opportunities and Trends

The Human Resources (HR) landscape is rapidly changing. Advances in technology, global economic conditions, and changes in the workforce have all contributed to the emergence of new challenges, opportunities, and trends in HR.

Technology has revolutionized the HR landscape. In the past, HR departments were largely paper-based, but now they are increasingly using online solutions and automation to streamline processes. This has led to a greater emphasis on data-driven decision making and analytics, as well as the development of cloud-based HR solutions. These technological advances have enabled HR departments to become more efficient and effective, while also providing them with access to new tools and resources.

Global economic conditions have had a significant impact on the HR landscape. Companies are now more likely to focus on cost-cutting measures, such as outsourcing or reducing staff. This has led to the emergence of new roles and responsibilities, such as those related to employee engagement and retention. Additionally, companies are increasingly looking to develop global strategies in order to remain competitive and capitalize on international markets.

Saurabh Kedar

has successfully completed the online, non-credit Professional Certificate

Google Data Analytics

Those who earn the Google Data Analytics Professional Certificate have completed eight courses, developed by Google, that include hands-on, practice-based assessments and are designed to prepare them for introductory-level roles in Data Analytics. They are competent in tools and platforms including spreadsheets, SQL, Tableau, and R. They know how to prepare, process, analyze, and share data for thoughtful action.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.

Mayur Nehare

has successfully completed the online, non-credit Professional Certificate

Google IT Automation with Python

This six-course certificate, developed by Google, is designed to provide IT professionals with in-demand skills -- including Python, Git, and IT automation -- that can help them advance their careers. The hands-on curriculum is designed to teach learners how to write code in Python, with a special focus on how this applies to automating tasks in the world of IT support and systems administration. Those who received this certificate passed all graded assessments with a score of 80% of above. They should have a strong foundation in how to use Git and GitHub, troubleshoot and debug complex problems, and apply automation at scale by using configuration management and the Cloud in order to prepare them for more advanced IT Support Specialist or Junior Systems Administrator positions.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment

Application of Full Stack Development Skills

Presentation and Evaluation

Program Overview:

This comprehensive Full Stack Development course, led by Mr. Ketan Pachpande, Product Architect at Gigasoft Technologies, is designed to provide students with a deep understanding of product architecture and the skills needed to excel in full-stack development. The course covers a wide range of technologies and methodologies, emphasizing hands-on projects, collaboration, and real-world applications.

The curriculum was meticulously designed to align with current industry trends and practices.

In-depth coverage of front-end technologies (HTML, CSS, JavaScript, React) and back-end development (Node.js, MongoDB) provided a well-rounded understanding of full-stack development. Mr. Ketan Pachpande's expertise as a Product Architect at Gigasoft Technologies enriched the learning experience.

Learning Outcomes:

Demonstrated proficiency in front-end and back-end technologies, enabling them to develop end-to-end web applications

Students Developed collaborative skills through version control practices and participation in agile development methodologies.

Students Acquired skills in deploying applications to cloud platforms and using containerization for efficient, scalable deployment.
Students gained a deep understanding of securing web applications against common threats.

Report on Data Science & Machine Learning

Title	Course on Data Science & Machine Learning
Name of Resource Person	Mr.Tushar B. Kute Data Scientist and Researcher at MITU Technologies, Pune
Co-ordinator	Dr. Ms. R. A. Zamare
Duration	7 March 2022 –To 24 May 2022
Platform	Microsoft Teams
Description	Data science involves the extraction of valuable insights from large and complex data sets. It encompasses data collection, cleaning, analysis, and visualization to inform decision-making. Machine learning, a subset of data science, focuses on creating algorithms that enable computers to learn from data, make predictions, and automate tasks without explicit programming.
No. of participants	27
Outcome	After attending this program students are able to 1. Enhanced Career Opportunities: Graduates are well-equipped for careers in data analysis, machine learning engineering, data engineering, and related fields, which are in high demand. 2. Competitive Skill Set: They gain expertise in data manipulation, analysis, and machine learning techniques, making them highly competitive in the job market. 3. Problem-Solving Proficiency: Students develop strong problem-solving and critical thinking skills, which are valuable in various industries. 4. Versatile Applications: These skills can be applied in diverse sectors, from healthcare and finance to marketing and research, enabling students to work in areas that align with their interests.

Report on Blockchain Technology

Title	Course on Blockchain Technology
Name of Resource Person	Mr.Yogesh Murumkar CEO, Bharat Soft Technologies
Co-ordinator	Prof. H. M. Deshmukh
Duration	12 March 2022 - 8 May 2022
Platform	Microsoft Teams
Description	Blockchain technology is a decentralized and distributed ledger system that securely records and verifies transactions across a network of computers. Each transaction forms a block, linked to the previous one, creating a chain of data. It is known for its transparency, immutability, and security, making it a foundation for various applications beyond cryptocurrencies, such as supply chain management, voting systems, and smart contracts.
No. of participants	62
Outcome	After attending this program students are able to 1. Understanding of Decentralized Systems: Students acquire a deep understanding of how decentralized, trustless networks operate, enabling them to work on projects that harness the benefits of blockchain technology. 2. Innovation and Entrepreneurship: Some may choose to start their blockchain-based ventures, create decentralized applications (DApps), or explore innovative use cases in various industries. 3. Contribution to Security: They can contribute to the improvement of blockchain security and integrity, addressing critical issues in the field.

About Program:

In general, aptitude tests measure one's competence in logical reasoning, numerical skills, or verbal ability; competency can be evaluated through problem-solving tasks and testing one's critical thinking across various contexts.

There are various topics under the syllabus of Quantitative Aptitude. Topics such as work and wages, permutation and combination, profit and loss, age, probability, percentages, ratios and many more. The above article contains all these important topics.

Aptitude tests are often used to assess academic potential or career suitability and may be used to assess either mental or physical talent in a variety of domains.

Topics Covered:

Square root, cube roots, Ratio proportions, partnerships, Averages, Allegation's & Mixtures, Questions on Ages, Number Series & Letter Series, Coding, decoding, calendars..

Learning Outcomes:

After successful completion of this course, students will have the knowledge and skills to

1. Analyze the Problems logically and approach the problems in a different manner.
2. It helps Candidates to conquer the success in job tests.
3. Solve the problems easily by using Short-cut method with time management which will be helpful to them to clear the competitive exams for better job opportunity.

Speaker	Mr. G. N. Bonde & Mr. P. R. Dhabe (Assistant Professor, SSGMCE Shegaon)
Organizer	IEl Department of Electrical Engineering Students' Chapter, SSGMCE Shegaon
Schedule of Activity	**10- 15th February 2022**
Duration	30 Hours
Objective of Activity	The primary objective of the MATLAB, Simulink & Programming Training for Electrical Engineering Students, led by instructors Ganesh Bonde and Pratik Dhabe, is to provide a comprehensive foundation in MATLAB, Simulink, and programming concepts. The course aims to empower electrical engineering students with practical skills, enabling them to utilize MATLAB and Simulink for effective problem-solving and algorithm development. some key objectives: To provide a thorough understanding of the MATLAB environment, command-line operations, and basic programming constructs.. To provide best practices for scripting and functions in MATLAB.. To develop algorithms and coding skills relevant to the field of electrical engineering. To explore real-world applications of programming in the electrical engineering domain.

Summary Report

Name of course: Basic of AutoCAD

Name of the Course Coordinator: Prof. C.V. Patil

Career Avenues: Completing a course on AutoCAD can open up several career opportunities, especially in the fields of advanced manufacturing and industrial automation.

Objectives of the Course

The objectives of the "Basics of AutoCAD" course include introducing students to AutoCAD's fundamental principles, teaching basic 2D drawing skills, and covering key concepts like layer management, dimensioning, and text annotation.

Outcomes of the Course

CO1: Students will demonstrate the ability to create, edit, and manipulate 2D drawings, utilizing AutoCAD's drawing tools and commands effectively.

CO2: Students will develop skills in organizing drawings through layer management and will be proficient in adding text, labels, and annotations to enhance drawing clarity.

CO3: Students will be able to apply AutoCAD concepts to real-world projects by successfully completing drawing assignments, demonstrating precision in measurements, and generating print-ready drawings.

Participants in the Microsoft Excel course have completed a comprehensive 30-hour training program. They have gained a strong foundation in Excel basics, advanced data manipulation techniques, data analysis, and advanced functions. Additionally, they have learned to create charts, graphs, and pivot tables, design dashboards, and work with macros and VBA for automation. The course concluded with a project presentation and assessment to ensure a deep understanding of the topics covered.

This course has been conducted successfully by Prof. B. T. Husain, an internal resource person from the Department of Business Administration and Research. The participants have acquired valuable skills that will enhance their proficiency in Microsoft Excel, allowing them to apply their knowledge in various academic and professional settings.

Certifications were be awarded to participants upon successful completion of the course

AMRUTA ATUL BOBADE

has successfully completed the online, non-credit Professional Certificate

Google UX Design

Those who earn the Google UX Design Professional Certificate have completed seven courses, developed by Google, that include hands-on, practice-based assessments and are designed to prepare them for introductory-level roles in UX design. They can complete the design process from beginning to end: empathizing with users, defining their pain points, coming up with ideas for design solutions, creating wireframes and prototypes, and testing designs to get feedback.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a university grade, course credit or degree, and it does not verify the identity of the learner.

About Program:

There are various topics under the syllabus of Quantitative Aptitude. Topics such as work and wages, permutation and combination, profit and loss, age, probability, percentages, ratios and many more. The above article contains all these important topics.

Aptitude tests are often used to assess academic potential or career suitability and may be used to assess either mental or physical talent in a variety of domains.

In general, aptitude tests measure one's competence in logical reasoning, numerical skills, or verbal ability; competency can be evaluated through problem-solving tasks and testing one's critical thinking across various contexts.

Topics Covered:
Permutations & Combinations, Probability, Simplification, Surds, Indices, Progression, Data interpretation, Data Sufficiency, Non Verbal series, Analogs, Pattern, Water and Mirror image.

Learning Outcomes:

After successful completion of this course, students will have the knowledge and skills to

1. It helps Candidates to conquer the success in job tests.
2. Solve the problems easily by using Short-cut method with time management which will be helpful to them to clear the competitive exams for better job opportunity.
3. Analyze the Problems logically and approach the problems in a different manner.

Google

Abhishek Moharir

has successfully completed the online, non-credit Professional Certificate

Google IT Automation with Python

This six-course certificate, developed by Google, is designed to provide IT professionals with in-demand skills -- including Python, Git, and IT automation -- that can help them advance their careers. The hands-on curriculum is designed to teach learners how to write code in Python, with a special focus on how this applies to automating tasks in the world of IT support and systems administration. Those who received this certificate passed all graded assessments with a score of 80% of above. They should have a strong foundation in how to use Git and GitHub, troubleshoot and debug complex problems, and apply automation at scale by using configuration management and the Cloud in order to prepare them for more advanced IT Support Specialist or Junior Systems Administrator positions.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.

About Program:

Aptitude tests are often used to assess academic potential or career suitability and may be used to assess either mental or physical talent in a variety of domains.

There are various topics under the syllabus of Quantitative Aptitude. Topics such as work and wages, permutation and combination, profit and loss, age, probability, percentages, ratios and many more. The above article contains all these important topics.

In general, aptitude tests measure one's competence in logical reasoning, numerical skills, or verbal ability; competency can be evaluated through problem-solving tasks and testing one's critical thinking across various contexts.

Topics Covered:

Permutations & Combinations, Probability, Simplification, Surds, Indices, Progression, data interpretation, Data Sufficiency, Non Verbal series, Analogs, Pattern, Water and Mirror image, Square root, cube roots, Ratio proportions, partnerships, Averages, Allegation's & Mixtures, Questions on Ages, Number Series & Letter Series, Coding, decoding, calenders.

Learning Outcomes:

After successful completion of this course, students will have the knowledge and skills to

1. Solve the problems easily by using Short-cut method with time management which will be helpful to them to clear the competitive exams for better job opportunity.
2. Analyze the Problems logically and approach the problems in a different manner.

About Program:

Fear, anxiety, and panic are all common emotions that can be experienced in life. Fear can be triggered by a particular situation, such as public speaking or a job interview. Anxiety can be a result of a high-stakes situation or an impending deadline. And panic can arise when life feels overwhelming or out of control.

However, fear, anxiety, and panic can all be managed and even overcome with the right strategies and techniques. In this article, we'll explore various ways to help you conquer these emotions and gain control of your life.

The first step in overcoming fear, anxiety, and panic is to gain a better understanding of these emotions. By knowing what triggers them and recognizing the signs, you can start to take control of the situation. Fear is usually triggered by a specific event or situation, and you can feel it in the form of physical symptoms such as sweating, shaking, and a racing heart.

Anxiety is usually caused by a sense of uncertainty and can manifest as feelings of dread or nervousness. Panic is a more intense emotion that can be caused by feelings of being overwhelmed and out of control.

About Program:

Public speaking, also called oratory or oration, has traditionally been defined as speaking in person to a live audience. Today, the term can also refer to speaking to an audience through digital technology. Public speaking is important for developing leadership abilities because it helps you convey your ideas effectively to others. The ability to persuade others and help them change their minds is essential for becoming an effective leader.

Group discussion (GD) is a comprehensive technique to judge the suitability of an individual and his appropriateness for admission, scholarship, job, etc. GD assesses the overall personality – thoughts, feelings and behaviour - of an individual in a group. A topic is presented to the group members for discussion.

A group discussion tests the teamwork and Communication Skill of candidates. A group discussion involves a discussion on a given topic with other candidates, usually with similar experience and educational qualifications. Performing well in a group discussion helps you to get noticed and practicing for one improves your public speaking skills. In this article, we will review what a group discussion is, its importance in the selection process, the skills evaluated during a group discussion and how to perform well in this round.

Do's of GD: Listen to other participants, maintain eye contacts with other participants, Give others time to peak, keep potential disagreement polite, Dress professionally, support your claim, welcome arguments, prepare for discussion, acknowledge others before speaking, initiate the conversation, plan your entry point, plan your exit point, take notes, ask for clarification, show confidence.

Don'ts of GD: Enter the conversation quickly, Over speak, Speak about other topics, Repeat other participants, Speak or gesture boldly, Interrupt others, Bring irrelevant or false statistics, Appear insecure, Share information that isn't valuable, Have negative body language, Share participant's space, Make eye contact with the evaluators, Focus on only one participant, Use judgmental language, Worry if the topic is unfamiliar.

About Program:

Self-awareness is your ability to perceive and understand the things that make you who you are as an individual, including your personality, actions, values, beliefs, emotions, and thoughts. Essentially, it is a psychological state in which the self becomes the focus of attention.

Self-esteem is how we value and perceive ourselves. It's based on our opinions and beliefs about ourselves, which can feel difficult to change. We might also think of this as self-confidence**.** Self-esteem is confidence in one's own worth, abilities, or morals. Self-esteem encompasses beliefs about oneself as well as emotional states.

Public speaking, also called oratory or oration, has traditionally been defined as speaking in person to a live audience. Today, the term can also refer to speaking to an audience through digital technology. Public speaking is important for developing leadership abilities because it helps you convey your ideas effectively to others. The ability to persuade others and help them change their minds is essential for becoming an effective leader.

Having strong communication skills aids in all aspects of life – from professional life to personal life and everything that falls in between. From a business standpoint, all transactions result from communication. Good communication skills are essential to allow others and yourself to understand information more accurately and quickly.

Department of Mechanical Engineering

Date: 23/07/2019

Notice

All the students of second year Mechanical engineering are hereby informed that our department is organizing two week training on AutoCAD software. The course will be taken by Mr. Vijay Kumar Bhambri, Nagpur. The course will start from 27th July, 2019 to 10th August, 2019. All the interested students should register their names to Mr. Prashant Deshmukh (CAD/CAM lab) till 25th July, 2019.

A Course on

"Training on AutoCAD Software"

Mr. Vijay Kumar Bhambri, Nagpur

Academic Year 2019-20

Mechanical Engineering Department

Shri Sant Gajanan Maharaj College of Engineering,

Khamgaon Road, Shegaon, Dist: Buldhana

Title of Activity	Training on AutoCAD Software
Speaker	Mr. Vijay Kumar Bhambri, Nagpur
Organizer	Mechanical Engineering Department
Schedule of Activity	**27-07-2019 to 10-08-2019**
Duration	35 Hours
Objective of Activity	Primary objective of The Training on AutoCAD Software, is to familiarize mechanical engineering students with the basics of AutoCAD software, including its interface, tools, and functionalities. some key objectives: To develop proficiency in 2D drafting, enabling students to create precise and detailed technical drawings using AutoCAD.. To introduce students to 3D modeling techniques, allowing them to create three-dimensional representations of mechanical components and assemblies. To provide practical insights into the application of AutoCAD in mechanical design, emphasizing industry-relevant practices and standards. To explore collaborative design features within AutoCAD, emphasizing teamwork and effective communication in the design process.
Venue	CAD/CAM Lab
No. of Beneficiaries	24 Students

Course Content:

The course covered the following key topics:

Course Content: AutoCAD Software Training

Module 1: Introduction to AutoCAD

Overview of AutoCAD software
User interface and navigation
Basic commands and tools

Module 2: 2D Drafting and Design

Creating and editing 2D geometries
Precision drafting techniques
Layers and annotations

Module 3: 3D Modeling Techniques

Introduction to 3D modeling
Creating 3D objects and surfaces
Extrusion, revolves, and sweep commands

Module 4: Application in Mechanical Design

Practical application of AutoCAD in mechanical design
Industry standards and practices
Case studies on real-world mechanical design projects

Program Overview:

The AutoCAD training conducted by Mr. Vijay Kumar Bhambri in Nagpur aimed to equip mechanical engineering students with essential skills in computer-aided design.

Mr. Vijay Kumar Bhambri, the facilitator of the AutoCAD Software Training Program, implemented a dynamic and comprehensive teaching approach. Through a series of engaging lectures, he adeptly conveyed theoretical knowledge; ensuring participants grasped the fundamental concepts of AutoCAD. The inclusion of practical sessions provided a hands-on learning experience, allowing students to apply theoretical understanding to real-world scenarios. To reinforce learning, Mr. Bhambri incorporated assignments, challenging participants to solidify their grasp of AutoCAD concepts and techniques. Furthermore, the program featured project work, offering participants the opportunity to synthesize their acquired skills and showcase their proficiency in practical design scenarios. This multifaceted teaching methodology fostered a well-rounded understanding of AutoCAD, preparing participants for effective application in the field of mechanical design.

Participants in the Microsoft Excel course have completed a comprehensive 30-hour training program. They have gained a strong foundation in Excel basics, advanced data manipulation techniques, data analysis, and advanced functions. Additionally, they have learned to create charts, graphs, and pivot tables, design dashboards, and work with macros and VBA for automation. The course concluded with a project presentation and assessment to ensure a deep understanding of the topics covered.

This course has been conducted successfully by Prof. S. M. Mishra, an internal resource person from the Department of Business Administration and Research. The participants have acquired valuable skills that will enhance their proficiency in Microsoft Excel, allowing them to apply their knowledge in various academic and professional settings.

Certifications were be awarded to participants upon successful completion of the course

Akshaykumar Bhople

has successfully completed the online, non-credit Professional Certificate

IBM Data Science

In this Professional Certificate learners developed and honed hands-on skills in Data Science and Machine Learning. Learners started with an orientation of Data Science and its Methodology, became familiar and used a variety of data science tools, learned Python and SQL, performed Data Visualization and Analysis, and created Machine Learning models. In the process they completed several labs and assignments on the cloud including a Capstone Project at the end to apply and demonstrate their knowledge and skills.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.

About Program:

Fear, anxiety, and panic are all common emotions that can be experienced in life. Fear can be triggered by a particular situation, such as public speaking or a job interview. Anxiety can be a result of a high-stakes situation or an impending deadline. And panic can arise when life feels overwhelming or out of control.

However, fear, anxiety, and panic can all be managed and even overcome with the right strategies and techniques. In this article, we'll explore various ways to help you conquer these emotions and gain control of your life.

The first step in overcoming fear, anxiety, and panic is to gain a better understanding of these emotions. By knowing what triggers them and recognizing the signs, you can start to take control of the situation. Fear is usually triggered by a specific event or situation, and you can feel it in the form of physical symptoms such as sweating, shaking, and a racing heart.

Anxiety is usually caused by a sense of uncertainty and can manifest as feelings of dread or nervousness. Panic is a more intense emotion that can be caused by feelings of being overwhelmed and out of control.

About Program:

Public speaking, also called oratory or oration, has traditionally been defined as speaking in person to a live audience. Today, the term can also refer to speaking to an audience through digital technology. Public speaking is important for developing leadership abilities because it helps you convey your ideas effectively to others. The ability to persuade others and help them change their minds is essential for becoming an effective leader.

Group discussion (GD) is a comprehensive technique to judge the suitability of an individual and his appropriateness for admission, scholarship, job, etc. GD assesses the overall personality – thoughts, feelings and behaviour - of an individual in a group. A topic is presented to the group members for discussion.

A group discussion tests the teamwork and Communication Skill of candidates. A group discussion involves a discussion on a given topic with other candidates, usually with similar experience and educational qualifications. Performing well in a group discussion helps you to get noticed and practicing for one improves your public speaking skills. In this article, we will review what a group discussion is, its importance in the selection process, the skills evaluated during a group discussion and how to perform well in this round.

Do's of GD: Listen to other participants, maintain eye contacts with other participants, Give others time to peak, keep potential disagreement polite, Dress professionally, support your claim, welcome arguments, prepare for discussion, acknowledge others before speaking, initiate the conversation, plan your entry point, plan your exit point, take notes, ask for clarification, show confidence.

Don'ts of GD: Enter the conversation quickly, Over speak, Speak about other topics, Repeat other participants, Speak or gesture boldly, Interrupt others, Bring irrelevant or false statistics, Appear insecure, Share information that isn't valuable, Have negative body language, Share participant's space, Make eye contact with the evaluators, Focus on only one participant, Use judgmental language, Worry if the topic is unfamiliar.

About Program:

Self-awareness is your ability to perceive and understand the things that make you who you are as an individual, including your personality, actions, values, beliefs, emotions, and thoughts. Essentially, it is a psychological state in which the self becomes the focus of attention.

Self-esteem is how we value and perceive ourselves. It's based on our opinions and beliefs about ourselves, which can feel difficult to change. We might also think of this as self-confidence**.** Self-esteem is confidence in one's own worth, abilities, or morals. Self-esteem encompasses beliefs about oneself as well as emotional states.

Public speaking, also called oratory or oration, has traditionally been defined as speaking in person to a live audience. Today, the term can also refer to speaking to an audience through digital technology. Public speaking is important for developing leadership abilities because it helps you convey your ideas effectively to others. The ability to persuade others and help them change their minds is essential for becoming an effective leader.

Having strong communication skills aids in all aspects of life – from professional life to personal life and everything that falls in between. From a business standpoint, all transactions result from communication. Good communication skills are essential to allow others and yourself to understand information more accurately and quickly.

Interpretation:

1) It is seen that almost all the participants found Soft Skill Training needed and useful for them.

2) The training is found to be as per the expectations of the candidates due the way it was delivered.

3) Participants are found to be highly satisfied with trainer's knowledge, content delivery and participation.

4) Demonstration, activity, presentation & content were adequate with respect to the training.

5) Training fulfills the objectives of the programme.

Title of Activity	Fundamentals of Solar photovoltaic
Speaker	Prof N.G.More ,SSGMCE, Shegaon
Organizer	Mechanical Engineering Department
Schedule of Activity	**26-02-2019 to 03-03-2019**
Duration	30 Hours
Objective of Activity	The Fundamentals of Solar Photovoltaic course, led by Prof. N.G. More at SSGMCE, Shegaon, is designed to provide mechanical engineering students with a comprehensive understanding of solar energy and its application in photovoltaic systems some key objectives: To Introduce students to the fundamental principles of solar photovoltaics, covering the conversion of sunlight into electrical energy. To Familiarize students with the components of solar photovoltaic systems, including solar cells, inverters, charge controllers, and batteries To Provide insights into the design and installation of solar photovoltaic systems, considering factors such as location, orientation, and sizing. To Explore the integration of solar photovoltaic systems with mechanical engineering applications, showcasing potential synergies and applications.
Venue	Solar Lab.
No. of Beneficiaries	30 Students

Course Content:

The course covered the following key topics:

Introduction to Solar Energy

Solar Photovoltaic Technologies

Components of PV Systems

Design and Installation Practices

Integration with Mechanical Engineering Applications

Program Overview:

Prof. N.G. More emphasized the significance of solar energy within the broader context of renewable resources. He conducted an in-depth exploration of various photovoltaic technologies and elucidated their practical applications. Additionally, he provided a detailed study of the essential components in a solar photovoltaic system, encompassing solar cells, inverters, charge controllers, and batteries. The consideration of system architecture and functionalities was thoroughly explained.

The course, under Prof. N.G. More's guidance, adopts a dynamic teaching approach that involves lectures to impart theoretical knowledge and foundational concepts. Furthermore, practical demonstrations were utilized to effectively illustrate the functioning of solar photovoltaic systems. This multi-faceted teaching methodology ensures a comprehensive understanding of both the theoretical principles and the practical applications of solar energy technologies.

Learning Outcomes:

Students demonstrated a comprehensive understanding of the fundamental principles and technologies associated with solar photovoltaics.

Students showcased the ability to apply theoretical knowledge to design and simulate solar photovoltaic systems, integrating concepts into practical solutions.

The course enhanced students' awareness of critical design considerations, including system sizing, location optimization, and integration with mechanical systems.

The interactive nature of the course facilitated collaboration among participants, encouraging the exchange of ideas and fostering a community of learners.

"Basics of CATIA"

Mr. Sacin Satpute MIT Skills Pune

Academic Year 2018-19

Mechanical Engineering Department

Shri Sant Gajanan Maharaj College of Engineering,

Khamgaon Road, Shegaon, Dist: Buldhana

Title of Activity	Basics of CATIA
Speaker	Mr Sacin Satpute MIT Skills Pune
Organizer	Mechanical Engineering Department
Schedule of Activity	**25-03-2019 to 30-03-2019**
Duration	30 Hours
Objective of Activity	The "Basics of CATIA" course, conducted by Mr. Sacin Satpute at MIT Skills Pune, aimed to equip mechanical engineering students with foundational skills in Computer-Aided Design using CATIA software. some key objectives: To Familiarize mechanical engineering students with the fundamental concepts and user interface of CATIA software. To Provide hands-on experience in sketching and creating 3D part models using CATIA, emphasizing best practices and efficient design techniques. To Introduce the principles of assembly design, allowing students to understand the process of combining multiple parts into a cohesive assembly using CATIA. To Train students in creating detailed engineering drawings and documentation using CATIA, emphasizing industry standards and conventions
Venue	Mechanical Seminar Hall
No. of Beneficiaries	68 Students

Course Content:

The course covered the following key topics:

Introduction to CATIA

Sketching and Part Design

Assembly Design

Surface Modeling

Drafting and Documentation

Analysis and Simulation

Program Overview:

he Basics of CATIA course, led by Mr. Sacin Satpute at MIT Skills Pune, is designed to equip mechanical engineering students with essential skills in Computer-Aided Design using CATIA software. The course provided a comprehensive understanding of CATIA's core functionalities and applications, preparing students for practical design and modeling tasks in various industries.

Mr. Sachin Satpute delivered a comprehensive overview of CATIA software, covering its user interface and fundamental concepts in computer-aided design. During practical sessions, participants engaged in hands-on activities, enhancing their skills in sketching and creating 3D part models while emphasizing the importance of efficient design practices. Furthermore, he introduced basic analysis and simulation tools within CATIA, providing insights into evaluating design performance. The course thus offered a well-rounded exploration of CATIA, combining theoretical understanding with practical application in design and analysis.

Learning Outcomes:

Students demonstrated Demonstrate effective part and assembly design skills adhering to industry standards.

Students applied the advanced surface modeling techniques for designing complex geometries and generated accurate engineering drawings and documentation using CATIA.

Students gained the basic understanding and application of analysis and simulation tools within CATIA.

4	Schedule of Activity	October 2018 To June 2019
5	Time	8am to 10am
6	Objective of Activity	**1.** Develop basic language proficiency in Japanese, covering fundamental skills such as listening, speaking, reading, and writing. **2.** Enable students to communicate effectively in everyday situations, such as greetings, introductions, and simple conversations. **3.** Introduce students to a selection of essential kanji characters, focusing on those commonly used in everyday contexts and basic communication. **4.** Teach fundamental grammar rules and sentence structures to allow students to construct simple sentences and express basic ideas. **5.** Prepare students for Japanese language proficiency exams (JLPT), providing guidance on exam formats, content, and strategies for success.
7	Venue	**D1 Classroom**
8	No. of Beneficiaries	Total- **23**
9	POs Addressed	**PO10, PO12**

About Program:

The primary aim of this program is to enable students to develop comprehensive proficiency in the Japanese language, encompassing listening, speaking, reading, and writing skills, along with a deep understanding of Japanese culture, to empower them for effective communication and engagement in diverse contexts.

Speaker Profile: Mr. Nilkanth Wankhade, Foreign Language Trainer, Surani Academy,Akola

Topics Covered: Japanese Language Course

Learning Outcomes:

1. Students achieved a foundational level of proficiency in listening, speaking, reading, and writing in the Japanese language.
2. Students gained an ability to engage in basic conversations, express ideas, and understand simple spoken and written Japanese Career Advantages:
3. Students gained Proficiency in reading and writing the basic Japanese scripts.
4. Improved confidence in using Japanese, leading to increased participation in conversations and activities.
5. Improved reading comprehension skills through exposure to various written materials.
6. Readiness to take Japanese Language Proficiency Test (JLPT) exams at an appropriate level, demonstrating language proficiency
7. Ability to construct basic written sentences and short paragraphs in Japanese.

Program Contents:

Dr. Wankhade conducted a Japanese Language Course tailored specifically for engineering students with the primary goal of providing a well-rounded learning experience. The course aimed to develop basic proficiency in listening, speaking, reading, and writing in Japanese, while also fostering an appreciation for Japanese culture and enhancing cross-cultural competence. Throughout the modules, which covered hiragana, katakana, basic kanji, grammar, and engineering-specific vocabulary, Dr. Wankhade employed interactive sessions, role-playing activities, and real-world engineering scenarios to reinforce language skills. One of the course's notable features was the inclusion of cultural integration workshops, providing students with insights into Japanese customs, traditions, and workplace etiquette. Japanese language enriched the practical application of language skills in the professional domain. Field trips to engineering-related establishments further allowed students to apply their language proficiency in real-world settings. Dr. Wankhade's Japanese Language Course successfully achieved its objectives, equipping participants with valuable linguistic and cultural skills essential for their future endeavors in the engineering field.

To provide practical, hands-on experience with PLC programming, troubleshooting, and configuring industrial automation systems. To cover industry-specific topics and case studies to ensure participants are familiar with the latest trends, challenges, and advancements in the field. To foster collaboration and teamwork among participants through group projects and interactive sessions, simulating real-world industrial scenarios.
Venue	PLC and Factory Automation Lab.
No. of Beneficiaries	32 Students

Course Content:

Introduction to PLC and Industrial Automation:

Overview of PLCs and their role in industrial automation

Introduction to automation systems and their applications

Basic Electrical and Electronics Concepts:

Review of fundamental electrical and electronic principles relevant to PLCs.

Understanding sensors, actuators, and control systems.

PLC Fundamentals:

In-depth exploration of PLC architecture and components

Understanding ladder logic programming

Hands-on PLC Programming:

Practical exercises for programming PLCs using industry-standard software

Troubleshooting and debugging PLC programs

Industrial Communication Protocols:

Overview of communication protocols such as Modbus, Profibus, and Ethernet/IP

Practical applications of communication protocols in industrial settings

Human-Machine Interface (HMI):

Introduction to HMI systems and their integration with PLCs

Hands-on experience in designing and implementing HMIs

Program Overview:

The PLC & Industrial Automation training program, led by industry experts Mr. Sarang Thakare and Mr. Samir Chaure from Prolific Systems and Tech Pvt. Ltd, Nagpur, provided a comprehensive learning experience for electrical engineering students. Spanning duration of 48 hours , the program seamlessly integrated theoretical sessions with hands-on exercises, ensuring participants gained practical skills in Programmable Logic Controllers (PLC) and Industrial Automation. The trainers, with their expertise, delivered engaging content, covering fundamental concepts and addressing current industry trends and challenges. The program emphasized collaboration through group projects, enabling participants to apply their knowledge to real-world scenarios and fostering teamwork

Learning Outcomes:

Students gained hands-on expertise, making them industry-ready.

Successful participants received certifications, validating their skills.

Students gained a thorough understanding of industrial automation systems, encompassing sensors, actuators, communication protocols, and human-machine interfaces.

Participants gained insights into current industry trends and emerging technologies in the field of industrial automation, ensuring they stay abreast of advancements.

Interpretation:

Students in the Industrial Automation course have gained significant advantages from the carefully crafted contents and well-structured format.

The course has proven exceptionally valuable for candidates.

The trainer's expertise and skillful delivery of course material have generated widespread satisfaction among participants.

The training seamlessly integrated impactful demonstrations, interactive activities, insightful presentations, and tailored content to precisely address the individual needs of participants.

Overall, the training unequivocally achieved the stipulated objectives of the program.
