Implementation of e-governance in **Finance and Accounts**

For the smooth conduction of Accounting Department, we use SAP (erp software) along with the SIS (Student Information Software).

SAP software centralizes data management, SAP software provides multiple business functions with a single view of the truth. This helps companies better manage complex business processes by giving employees of different departments easy access to real-time insights across the enterprise. It can help in financial planning, budgeting and forecasting across organization. IT has more than 12 modules for various business process, SSGMCE implemented finance and controlling, materials management and payroll. Below processes have been made available for the conduction of SSGMCE business process.

- Collection of Student fees
- Cash flow
- Cash book
- Receipts and payments
- Financial Statements
- Maintain the staff salaries
- Procurement of the materials and maintain the inventory

Along with SAP, student information system software (SIS) is also used to facilitate the students, administrator (Registrar) and accounts department to show the data related to the student fees and various reports like fees outstanding and scholarship.

Implementation of e-governance in Examination

The Examination module operates by collecting data from faculties throughout the semester, including daily attendance, assessment marks, and completed test scores. Towards the semester's end, the Deans of Examination and Academics utilize the Student Information System (SIS) software to process this data. This process involves converting the collected information into internal marks, which are then submitted to the SGBAU (Sant Gadge Baba Amravati University).
