About Program:

In general, aptitude tests measure one's competence in logical reasoning, numerical skills, or verbal ability; competency can be evaluated through problem-solving tasks and testing one's critical thinking across various contexts.

There are various topics under the syllabus of Quantitative Aptitude. Topics such as work and wages, permutation and combination, profit and loss, age, probability, percentages, ratios and many more. The above article contains all these important topics.

Aptitude tests are often used to assess academic potential or career suitability and may be used to assess either mental or physical talent in a variety of domains.

Topics Covered:
Square roots, Cube roots, Squares, Ratio Proportion, Allegation's & Mixtures, Number Series & Letter Series, Coding-Decoding, Calendars, Clocks, Partnerships, Basic Geometry & Algebra, Questions on Ages, Pattern Completion, Mirror Image & Water Image, Data Sufficiency etc.

Learning Outcomes:

After successful completion of this course, students will have the knowledge and skills to

1. Solve the problems easily by using Short-cut method with time management which will be helpful to them to clear the competitive exams for better job opportunity.
2. It helps Candidates to conquer the success in job tests.
3. Analyze the Problems logically and approach the problems in a different manner.

Course Contents:

Following is the Quantitative Aptitude & Logical Reasoning training plan for 3rd year Engineering Students **(Semester- V.)**

S.N.	Chapter Name
1.	Square roots, Cube roots, Squares
2.	Ratio Proportion
3.	Partnerships
4.	Averages
5.	Allegation's & Mixtures
6.	Questions on Ages
7.	Analogies or similarities
8.	Number Series & Letter Series
9.	Coding-Decoding
10.	Calendars
11.	Clocks

Following is the Quantitative Aptitude & Logical Reasoning actual training plan implemented for Third Year Engineering Students **(Semester-VI).**

TRAINING AND PLACEMENT DEPARTMENT

Date: 26th Feb. 2019

"APTITUDE TEST PREPARATION CLASSES" FOR ALL B.E. THIRD YEAR STUDENTS

Training and Placement Department is arranging **"APTITUDE TEST PREPARATION CLASSES"** for all the interested students from B.E. Third Year (all branches). The classes would be conducted by **BASE Education, Pune (Mr. Ajay Butwani Sir) on 1st , 2nd , 3rd & 4th March 2019 at SSGMCE, Shegaon .**

The students registering for the classes will get **1** placement drive **per 70 students registration (i.e. if 200 students register for the classes then at least 3 placement drives will be offered to the registered students)** by BASE Education free of cost.

All B.E. Third year students interested in joining the Aptitude Test Preparation Classes by BASE Education should register their names by **paying Rs.1000/-(with printed book Authored by Butwani Sir) /Rs.900/-(without the printed book)** in T&P Dept **on or before 1st March 2019**. The classes will be approximately for **duration = 7 hr/day x 4 days = 35 hrs.** The exact timing will be discussed on day1 of the classes. (The same course with few more topics will be repeated during your final year in the month of August/September 2019 at Free of charge.)

The placement drives **offered by BASE Education** (free of charge) will be only for the students who take the Aptitude coaching classes from BASE Education.

The list of some of the probable companies with whom BASE Education has been tied up for placements is given below:-

1. Wide Vision Technologies: - IT: - Android developer/dot net developer
2. Quest global: - IT: - Jr. software engineer
3. TechMahindra: - All branches: - Tech support engineer
4. KPMG All branches: - Tech support engineer
5. Empire IT Park: - All branches: - Tech support engineer
6. Infosys: - All branches: - Tech support engineer
7. Traingle Inc.: - Electronics engineering
8. BulMart: - All branches: - Business analyst
9. Varsha Forging – Mechanical Engineering
10. Wipro Lighting – Mechancial, Electrical & Electronics Engineering
11. Safalya Industries –
12. Bajaj Group –Electrical, Mechanical& Electronics And few more will be added soon
13. Varroc Engineering, Aurangabad.

About Program:

Fear, anxiety, and panic are all common emotions that can be experienced in life. Fear can be triggered by a particular situation, such as public speaking or a job interview. Anxiety can be a result of a high-stakes situation or an impending deadline. And panic can arise when life feels overwhelming or out of control.

However, fear, anxiety, and panic can all be managed and even overcome with the right strategies and techniques. In this article, we'll explore various ways to help you conquer these emotions and gain control of your life.

The first step in overcoming fear, anxiety, and panic is to gain a better understanding of these emotions. By knowing what triggers them and recognizing the signs, you can start to take control of the situation. Fear is usually triggered by a specific event or situation, and you can feel it in the form of physical symptoms such as sweating, shaking, and a racing heart.

Anxiety is usually caused by a sense of uncertainty and can manifest as feelings of dread or nervousness. Panic is a more intense emotion that can be caused by feelings of being overwhelmed and out of control.

About Program:

Public speaking, also called oratory or oration, has traditionally been defined as speaking in person to a live audience. Today, the term can also refer to speaking to an audience through digital technology. Public speaking is important for developing leadership abilities because it helps you convey your ideas effectively to others. The ability to persuade others and help them change their minds is essential for becoming an effective leader.

Group discussion (GD) is a comprehensive technique to judge the suitability of an individual and his appropriateness for admission, scholarship, job, etc. GD assesses the overall personality – thoughts, feelings and behaviour - of an individual in a group. A topic is presented to the group members for discussion.

A group discussion tests the teamwork and Communication Skill of candidates. A group discussion involves a discussion on a given topic with other candidates, usually with similar experience and educational qualifications. Performing well in a group discussion helps you to get noticed and practicing for one improves your public speaking skills. In this article, we will review what a group discussion is, its importance in the selection process, the skills evaluated during a group discussion and how to perform well in this round.

Do's of GD: Listen to other participants, maintain eye contacts with other participants, Give others time to peak, keep potential disagreement polite, Dress professionally, support your claim, welcome arguments, prepare for discussion, acknowledge others before speaking, initiate the conversation, plan your entry point, plan your exit point, take notes, ask for clarification, show confidence.

Don'ts of GD: Enter the conversation quickly, Over speak, Speak about other topics, Repeat other participants, Speak or gesture boldly, Interrupt others, Bring irrelevant or false statistics, Appear insecure, Share information that isn't valuable, Have negative body language, Share participant's space, Make eye contact with the evaluators, Focus on only one participant, Use judgmental language, Worry if the topic is unfamiliar.

Glimpse of Training

About Program:

Self-awareness is your ability to perceive and understand the things that make you who you are as an individual, including your personality, actions, values, beliefs, emotions, and thoughts. Essentially, it is a psychological state in which the self becomes the focus of attention.

Self-esteem is how we value and perceive ourselves. It's based on our opinions and beliefs about ourselves, which can feel difficult to change. We might also think of this as self-confidence**.** Self-esteem is confidence in one's own worth, abilities, or morals. Self-esteem encompasses beliefs about oneself as well as emotional states.

Public speaking, also called oratory or oration, has traditionally been defined as speaking in person to a live audience. Today, the term can also refer to speaking to an audience through digital technology. Public speaking is important for developing leadership abilities because it helps you convey your ideas effectively to others. The ability to persuade others and help them change their minds is essential for becoming an effective leader.

Having strong communication skills aids in all aspects of life – from professional life to personal life and everything that falls in between. From a business standpoint, all transactions result from communication. Good communication skills are essential to allow others and yourself to understand information more accurately and quickly.

Students are practicing communication skill activity during training.

8	The training made the objectives was.	0	1	7	16	26
9	The training made my expectation is.	0	0	9	16	25
10	Adequate time was provided for Questions and Discussions.	0	3	6	21	20

Student's response to the questionnaire as per Feed Back form.

Interpretation:

1) It is seen that almost all the participants found Soft Skill Training needed and useful for them.

2) The training is found to be as per the expectations of the candidates due the way it was delivered.

3) Participants are found to be highly satisfied with trainer's knowledge, content delivery and participation.

4) Demonstration, activity, presentation & content were adequate with respect to the training.

5) Training fulfills the objectives of the programme.

Workshop Summary Report

Workshop Title **:** Embedded systems and Internet of Things

Date **:** 11 Jun 2018 -7 July2018

Location **:** EXTC seminar Hall & VLSI Lab.

Organizing Institute **:** SSGMCE, Shegaon

Workshop Cooridnator **:** Dr. K.B.Khanchandani & Dr.P.R.WanKhede

Number of Participants **: 27**

Workshop Objectives:

1 To familiar with the various Embedded processor and IOT applications

2 Develop applications design Embedded processor and IOT applications.

Outcomes:

1.Will be able to understand working of Arduino & Rasberry Pi embedded controllers

2. Can develop application with Embedded C and controllers.

3. Mini project designs using Arduino & IOT concepts.

IEEE
SSGMCE STUDENTS BRANCH

Department of Electronics and Telecommunication Engineering

Summer School - 2018

Electronics and Telecommunication Engineering department in collaboration with IEEE Students Branch is organising Summer School - 2018 for engineering UG and PG students to develop technical skill and employability enhancement. Summer School – 2018 is having following three Training Programs, which will help to learn cutting edge technologies from basics to advance. Hands on sessions in each training program will help to analyse and design applications.

Number of Participants **: 19**

Workshop Objectives:

1 To understand the concepts of analog devices & circuits.

2 To design and develop analog devices & various application circuits using Cadence tools

Outcomes:

1.Will be able to understand design approaches for developing analog devices and circuits

2. Can understand the use of Cadence Tool for developing devices and circuits.

3. Mini project designs using Cadence tool.

Summer School - 2018

Electronics and Telecommunication Engineering department in collaboration with IEEE Students Branch is organising Summer School - 2018 for engineering UG and PG students to develop technical skill and employability enhancement. Summer School – 2018 is having following three Training Programs, which will help to learn cutting edge technologies from basics to advance. Hands on sessions in each training program will help to analyse and design applications.

Date : 8 - 23 Sept 2018

Location : EXTC seminar Hall & VLSI Lab.

Organizing Institute : SSGMCE, Shegaon

Workshop Facilitators : Prof. S.P.Badar

Number of Participants : 35

Workshop Objectives:

1 To familiar with digital design concepts using different approaches.

2 Design of combinational circuits using CMOS.

3 Design of sequential circuits using CMOS.

4. Design and development using Xilinx software

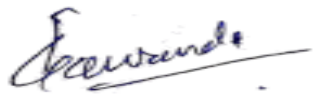

Outcomes:

1.Will be able to design combinational and sequential circuits using Xilinx software.

2. Simulation and synthesis of digital circuits using Xilinx software.

Hands on Digital VLSI Design using Xilinx

The Department of Electronics and Telecommunication is going to organize A Three Days Workshop on Hands on Digital VLSI Design using Xilinx during 8th to 10th Sept 2018.

The details of workshop as follows:

Software Tools : Xilinx ISE™ 13.4 ISim (VHDL / Verilog) Simulator
Date : **8th to 10th Sept 2018.**
Venue : DSP Lab, EXTC Dept.
Registration Fees : Rs.1000/-

Schedule and Contents:

Date	Time	Contents
8th Sept. 2018 (Day 1 - Saturday)	1.30 pm to 7.00 pm	Introduction to Digital VLSI Design
		Basics of VHDL
		Description of Hardware In VHDL
		Modelling Style of Design .
		Behavioral Modelling
		Basics of Logic Gates, Flip-flops
		Multiplexer, Demultiplexer
9th Sept. 2018 (Day 2 - Sunday)	8.00 am to 7.00 pm	Counter, Shift Register
		Data flow Modelling
		Half Adder, Full adder
		ALU
		Structural and Mixed Style of Modelling
		Full Adder
		4-bit Adder, 16-bit Adder etc…
10th Sept. 2018 (Day 3 - Monday)	7.30 am to 10.00 am	2-bit Multiplier, 4-bit Multiplier etc…
		Vedic Multiplier
		FPGA Board Implementation

Mechanical Engineering Department

Shri Sant Gajanan Maharaj College of Engineering,

Khamgaon Road, Shegaon, Dist: Buldhana

Title of Activity	Fundamentals of Solar photovoltaic
Speaker	Prof N.G.More ,SSGMCE, Shegaon
Organizer	Mechanical Engineering Department
Schedule of Activity	**26-02-2019 to 03-03-2019**
Duration	30 Hours
Objective of Activity	The Fundamentals of Solar Photovoltaic course, led by Prof. N.G. More at SSGMCE, Shegaon, is designed to provide mechanical engineering students with a comprehensive understanding of solar energy and its application in photovoltaic systems some key objectives: To Introduce students to the fundamental principles of solar photovoltaics, covering the conversion of sunlight into electrical energy. To Familiarize students with the components of solar photovoltaic systems, including solar cells, inverters, charge controllers, and batteries To Provide insights into the design and installation of solar photovoltaic systems, considering factors such as location, orientation, and sizing. To Explore the integration of solar photovoltaic systems with mechanical engineering applications, showcasing potential synergies and applications.
Venue	Solar Lab.
No. of Beneficiaries	30 Students

Course Content:

The course covered the following key topics:

Introduction to Solar Energy

Solar Photovoltaic Technologies

Components of PV Systems

Design and Installation Practices

Integration with Mechanical Engineering Applications

Program Overview:

Prof. N.G. More emphasized the significance of solar energy within the broader context of renewable resources. He conducted an in-depth exploration of various photovoltaic technologies and elucidated their practical applications. Additionally, he provided a detailed study of the essential components in a solar photovoltaic system, encompassing solar cells, inverters, charge controllers, and batteries. The consideration of system architecture and functionalities was thoroughly explained.

The course, under Prof. N.G. More's guidance, adopts a dynamic teaching approach that involves lectures to impart theoretical knowledge and foundational concepts. Furthermore, practical demonstrations were utilized to effectively illustrate the functioning of solar photovoltaic systems. This multi-faceted teaching methodology ensures a comprehensive understanding of both the theoretical principles and the practical applications of solar energy technologies.

Learning Outcomes:

Students demonstrated a comprehensive understanding of the fundamental principles and technologies associated with solar photovoltaics.

Students showcased the ability to apply theoretical knowledge to design and simulate solar photovoltaic systems, integrating concepts into practical solutions.

The course enhanced students' awareness of critical design considerations, including system sizing, location optimization, and integration with mechanical systems.

The interactive nature of the course facilitated collaboration among participants, encouraging the exchange of ideas and fostering a community of learners.

Report of add on course on "Fundamentals of solar photovoltics"

Date: 05/03/2019

Introduction:

The course is started on 26th Feb, 2019 with 36 enrolled students. The course continues for six days and each day students are engaged for 3 hrs. The theory session is conducted in the first hour of each day and followed by the hands on practice on application of solar technology.

Course objectives:

1. To aware students about the solar technology
2. To aware the students about recent advancements in photovoltaic technology
3. To provide practical exposure of solar photovoltaic technology to the students of the institute

Course outcomes:

After successful completion of the course, students will able to -

1. Understand the basics of solar technology
2. Understand the latest trends in solar photovoltaic technology
3. Apply the knowledge of solar technology in solar power production.

Title of Activity	Basics of CATIA
Speaker	Mr Sacin Satpute MIT Skills Pune
Organizer	Mechanical Engineering Department
Schedule of Activity	**25-03-2019 to 30-03-2019**
Duration	30 Hours
Objective of Activity	The "Basics of CATIA" course, conducted by Mr. Sacin Satpute at MIT Skills Pune, aimed to equip mechanical engineering students with foundational skills in Computer-Aided Design using CATIA software. some key objectives: To Familiarize mechanical engineering students with the fundamental concepts and user interface of CATIA software. To Provide hands-on experience in sketching and creating 3D part models using CATIA, emphasizing best practices and efficient design techniques. To Introduce the principles of assembly design, allowing students to understand the process of combining multiple parts into a cohesive assembly using CATIA. To Train students in creating detailed engineering drawings and documentation using CATIA, emphasizing industry standards and conventions
Venue	Mechanical Seminar Hall
No. of Beneficiaries	68 Students

Course Content:

The course covered the following key topics:

Introduction to CATIA

Sketching and Part Design

Assembly Design

Surface Modeling

Drafting and Documentation

Analysis and Simulation

Program Overview:

he Basics of CATIA course, led by Mr. Sacin Satpute at MIT Skills Pune, is designed to equip mechanical engineering students with essential skills in Computer-Aided Design using CATIA software. The course provided a comprehensive understanding of CATIA's core functionalities and applications, preparing students for practical design and modeling tasks in various industries.

Mr. Sachin Satpute delivered a comprehensive overview of CATIA software, covering its user interface and fundamental concepts in computer-aided design. During practical sessions, participants engaged in hands-on activities, enhancing their skills in sketching and creating 3D part models while emphasizing the importance of efficient design practices. Furthermore, he introduced basic analysis and simulation tools within CATIA, providing insights into evaluating design performance. The course thus offered a well-rounded exploration of CATIA, combining theoretical understanding with practical application in design and analysis.

Learning Outcomes:

Students demonstrated Demonstrate effective part and assembly design skills adhering to industry standards.

Students applied the advanced surface modeling techniques for designing complex geometries and generated accurate engineering drawings and documentation using CATIA.

Students gained the basic understanding and application of analysis and simulation tools within CATIA.

techniques, data analysis, and advanced functions. Additionally, they have learned to create charts, graphs, and pivot tables, design dashboards, and work with macros and VBA for automation. The course concluded with a project presentation and assessment to ensure a deep understanding of the topics covered.

This course has been conducted successfully by Prof. S. M. Mishra, an internal resource person from the Department of Business Administration and Research. The participants have acquired valuable skills that will enhance their proficiency in Microsoft Excel, allowing them to apply their knowledge in various academic and professional settings.

Certifications were be awarded to participants upon successful completion of the course

Calculate your final grade based on the following grading scale:

A: 90-100

B: 80-89

C: 70-79

D: 60-69

F: 0-59

Use an IF statement to determine your final grade based on your calculated percentage.

Data Validation (Topics: Data Validation and Error Handling):

Use data validation to ensure that the Points Earned and Total Points Possible columns only accept numeric values.

Report (Topics: Workbook Protection and Security):

Add a simple header with your name and course details to the worksheet.

Protect the worksheet to prevent unauthorized changes.

Assessment:

You will be assessed on your ability to create a functional grade calculator in Excel. The assessment will focus on the accuracy of the calculations, your proficiency in basic Excel functions, and the presentation of the final grade.

Case 2:

Case Study: Travel Itinerary and Expense Tracker

🌍 Your Upcoming Adventure 🌍

Introduction:

You're about to embark on an exciting international adventure, and you want to create a dynamic travel itinerary and expense tracker using Excel. This will help you plan your trip, keep track of your activities, and monitor your expenses on the go.

Tasks:

📅 Travel Itinerary (Topics: Data Entry and Formatting):

Create a new worksheet titled "Travel Itinerary."

Set up columns for Date, Destination, Activity, Time, and Notes.

Fill in the itinerary with details of your daily activities during your trip, including the date, destination, planned activity, time, and any additional notes.

🌟 Highlighting Special Events (Topics: Conditional Formatting):

Use conditional formatting to highlight special events or unique activities during your trip. For example, highlight the day of a special festival or celebration in a different color.

📊 Interactive Map (Topics: Charts and Graphs):

Create an interactive map of your destinations using an online map tool or by inserting a map image. Pinpoint each destination on the map, and hyperlink the destinations to their corresponding details in the itinerary.

Ph : +9186696380 81/82
Fax : 091-7265-252346
Email.principal@ssgmce.ac.in, registrar@ssgmce.ac.in
Website- www.ssgmce.ac.in

💰 Expense Tracker (Topics: Data Validation and Error Handling):

Create a new worksheet titled "Expense Tracker."

Set up columns for Date, Expense Category, Expense Description, Amount, and Payment Method.

Enter details of your expenses during the trip, including the date, expense category, description, amount, and payment method.

📈 Expense Summary (Topics: Charts and Graphs):

Create a bar chart to visualize your expenses by category. Each category will represent a bar, and the height of the bar will indicate the total expense for that category.

📅 Daily Expense Summary (Topics: Pivot Tables and Pivot Charts):

Use a pivot table to create a daily expense summary. This table will show the total expenses for each day, allowing you to monitor your daily spending.

📖 Personal Travel Diary (Topics: Workbook Protection and Security):

Keep a personal travel diary by adding a new worksheet for each day. You can write about your experiences, memories, and reflections. Protect this diary worksheet with a password for privacy.

🔍 Item Search (Topics: Advanced Functions and Formulas):

Create a search feature that allows you to find specific items (activities or expenses) within your itinerary or expense tracker based on keywords.

Assessment:

You will be assessed on your ability to create an engaging and functional travel itinerary and expense tracker. The assessment will focus on the organization of your trip details, the accuracy of data entry, proficiency in Excel functions, the quality of interactive features, and the overall presentation.

Program Contents:

Dr. Wankhade conducted a Japanese Language Course tailored specifically for engineering students with the primary goal of providing a well-rounded learning experience. The course aimed to develop basic proficiency in listening, speaking, reading, and writing in Japanese, while also fostering an appreciation for Japanese culture and enhancing cross-cultural competence. Throughout the modules, which covered hiragana, katakana, basic kanji, grammar, and engineering-specific vocabulary, Dr. Wankhade employed interactive sessions, role-playing activities, and real-world engineering scenarios to reinforce language skills. One of the course's notable features was the inclusion of cultural integration workshops, providing students with insights into Japanese customs, traditions, and workplace etiquette. Japanese language enriched the practical application of language skills in the professional domain. Field trips to engineering-related establishments further allowed students to apply their language proficiency in real-world settings. Dr. Wankhade's Japanese Language Course successfully achieved its objectives, equipping participants with valuable linguistic and cultural skills essential for their future endeavors in the engineering field.

About Program:
Program was organized for BE final year student, Dr. Rajkamal was the resource person.

This programme was intended to make students aware of practical skills needed to harness the combined power of Machine Learning (ML) and the Internet of Things (IoT). It also focuses on explore future trends in these transformative technologies.

Learning Outcomes:

1. Students are able to acquire the ability to integrate machine learning algorithms with IoT data.
2. Students are able to learn the step-by-step process of building and training machine learning models, understanding dataset preparation.
3. Students are able to showcase acquired skills by completing a workshop project, demonstrating the integration of ML and IoT principles.
4. Students are able to gain a solid foundation in machine learning concepts, including supervised and unsupervised learning.

Respected Sir,

On behalf of Shri Sant Gajanan Maharaj College of Engg Shegaon, I am very pleased to have the honor of inviting you as an adjunct faculty for the lecture series in the department of Computer Sci & Engg. ,which is secluded from 4th Feb 2019 .

Your knowledge, experience, perspective and participation in the computer field and technical education would add a great value to the students as well as to faculty of our institute.

Hope you will find time out of your busy schedule to share your ocean of knowledge with us and accept our invitation for said lecture series.

We look forward to your presence and guidance.

Thanking you,
Best wishes.

Interpretation:

Students have benefited from course content and structure.

The course has consistently met and exceeded the expectations of its candidates.

The trainer's expertise and effective delivery of course material have garnered widespread satisfaction among participants.

The training incorporated impactful demonstrations, engaging activities, insightful presentations, and tailored content to address participants' specific needs.

Overall, the training unequivocally achieved the stated objectives of the program.

About Program:

Program was organized for BE 2nd and 3rd year student, Prof. C. M. Mankar was the resource person. This programme was intended to make students aware of Data Science, Data science process/Cycle, apache spark for machine learning, loading data from file to apache table.

Learning Outcomes:

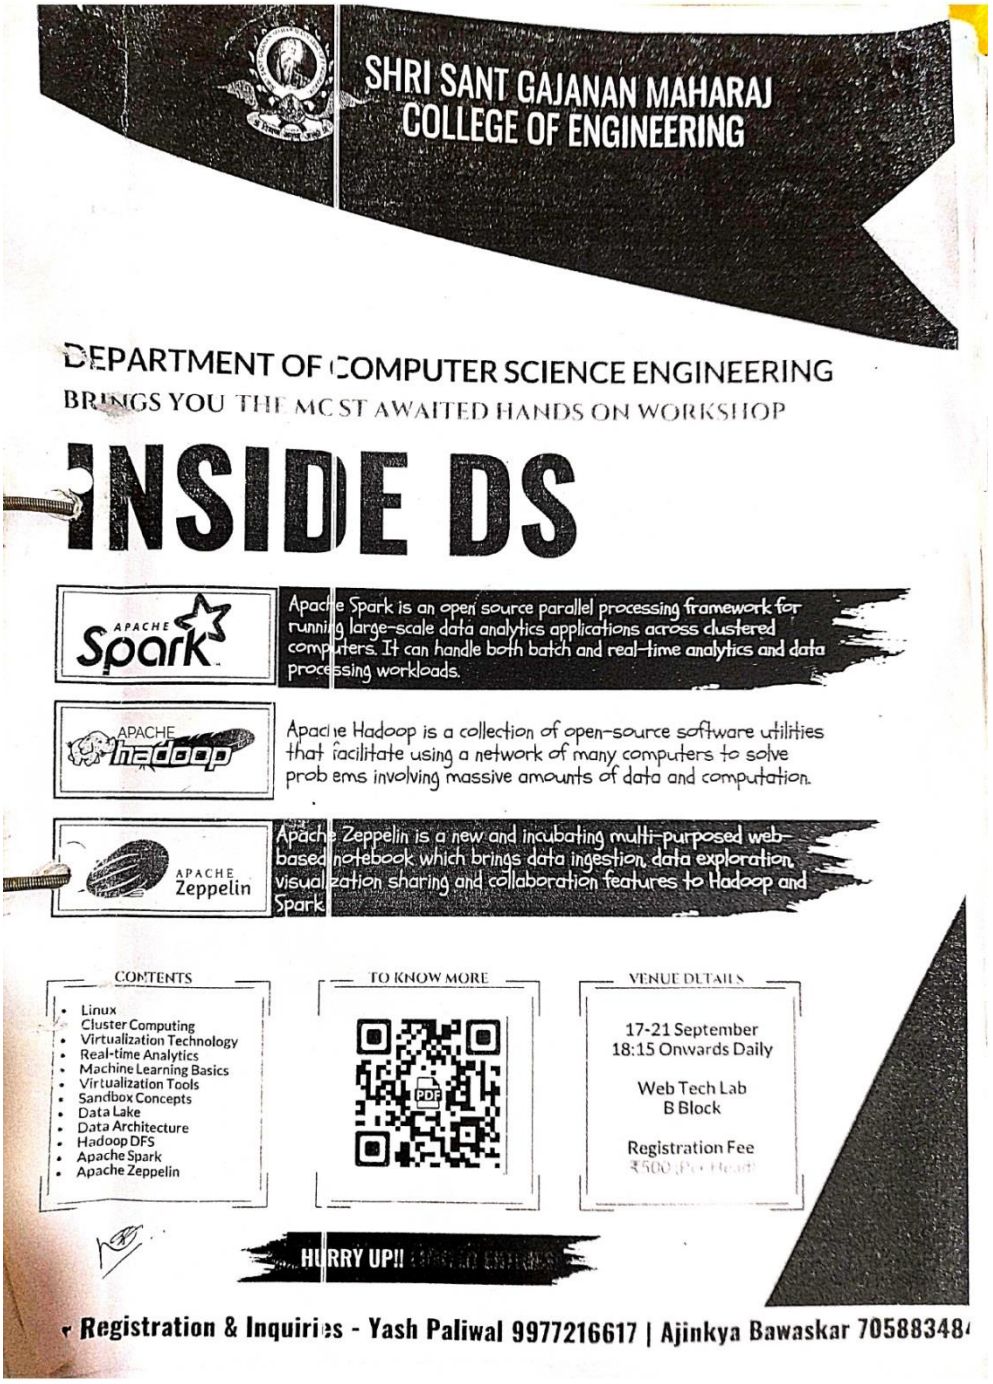

1. Students are able to understand about machine learning and data visualization.
2. Students are able to learn the process of building and training machine learning models.
3. Students are able to build the project with the dataset and using open source tools.
4. Students are able to load the dataset form local file system to apache tables.

SUBJECT: Permission for conducting a 5 days Hands-On workshop on Data Science Tech - "Inside DS", **5 Days** (17 Sept 2018 to 21 Sept 2018)

VENUE : **Web Tech Lab**
PARTICIPATION FEES : **Rs 500/-** Per Head

We are planning to conduct a workshop titled: "Inside DS", in order to motivate students to learn and prepare for data science technologies. To encourage them immediately to start working on mini/major projects based on open source softwares.

The objective of workshop is

- 5 Days hands-on training on Hadoop HDFS & systems like Apache Spark for Machine learning, Zeppelin for visualizations etc
- To understand importance of cluster computing, virtualization technologies,
- To motivate students to choose projects completely based on open source software,
- Understanding to build projects on data and data products,
- Real time analytics and tools,
- Introductory concepts of machine learning, visualizations and open source tools,
- Concepts of sandbox,
- Data Lake and architecture.

In this workshop we shall try to cover following contents:

- Data science, data, data driven products, data brokers,
- Bad data and dirty data its impact on revenue,
- Roles of data science team,
- Data lake concept and data lake architecture,
- Data science process/ cycle,
- Vertical & Horizontal scaling, intro to cluster computing, virtualization,
- Role of data analyst and required skills,
- Intro to Apache Spark for Machine learning and Apache Zeppelin for visualizations,
- Loading data from local file system to Apache Hive tables,
- Communication and data visualization.

The workshop could be scheduled as follows

17/09/2018	Mon	06:15-08:15 PM
18/09/2018	Tue	06:15-08:15 PM
19/09/2018	Wed	06:15-08:15 PM
20/09/2018	Thu	FULL DAY
21/09/2018	Fri	06:15-08:15 PM

We are sure that, 2nd and 3rd year CSE & IT students can take the benefit. Students interested in learning open source data science technologies can participate in 5 days hands-on training with full awareness. These contents are not in syllabus. It is an effort to provide contents not in syllabus to them. This is very important in today's I.T. industries.

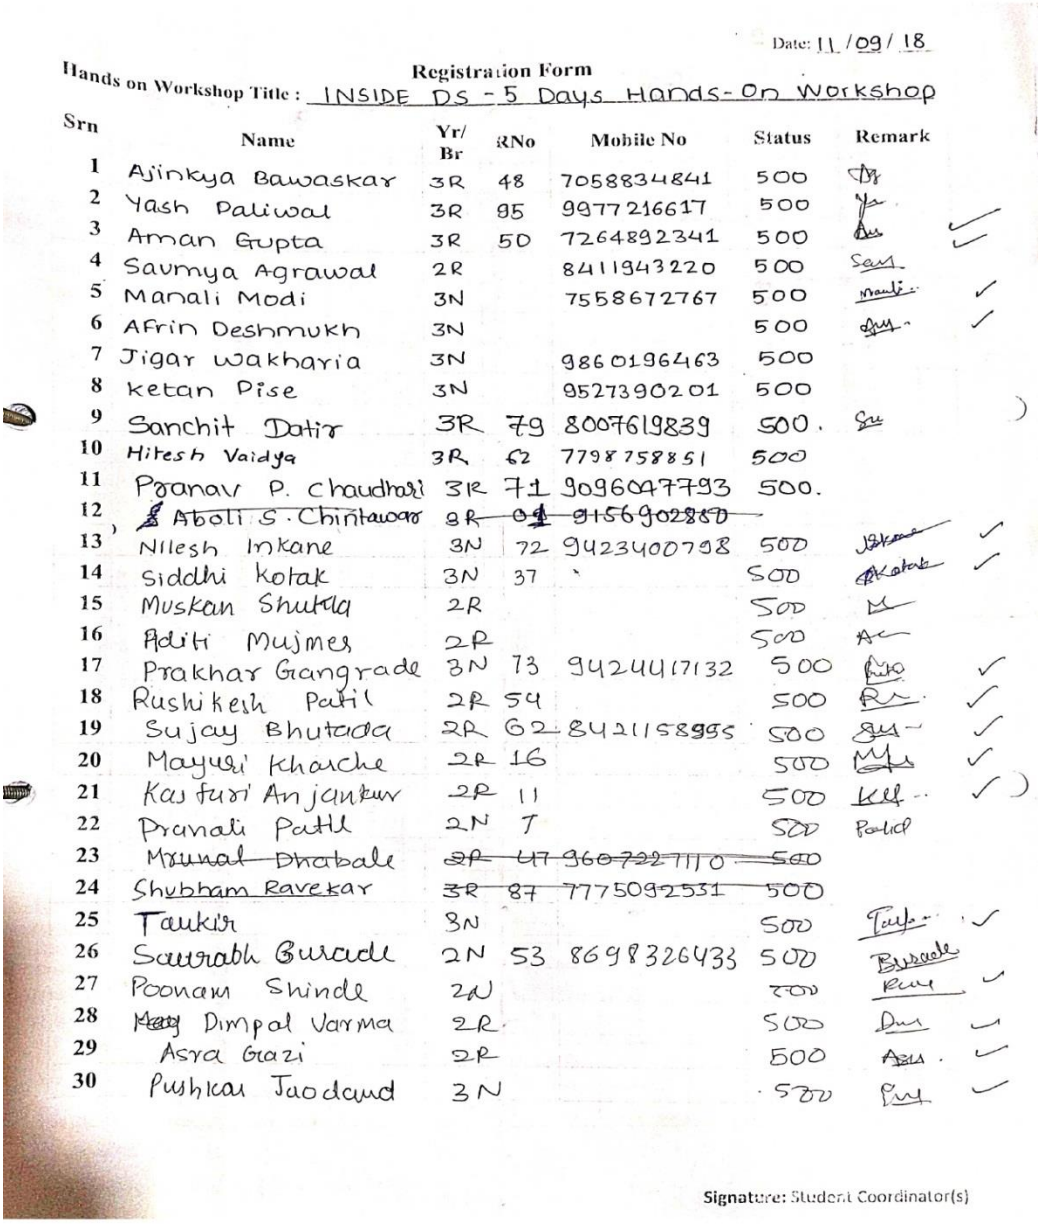

We hope, you will kindly consider the application and guide us in this regard.

Thanking you!

Yours faithfully,

Title of Activity	Training Program on PLC & Industrial Automation
Speaker	Mr. Sarang Thakare and Mr.Samir Chaure (Prolific Systems and Tech Pvt.Ltd, Nagpur
Organizer	Electrical Engineering Department
Schedule of Activity	**8/08/2018 to 17/08/2018**
Duration	48 Hours
Objective of Activity	The primary objective of the training program conducted by Mr. Sarang Thakare and Mr. Samir Chaure from Prolific Systems and Tech Pvt. Ltd, Nagpur, is to provide comprehensive and hands-on knowledge to electrical engineering students in the field of Programmable Logic Controllers (PLC) and Industrial Automation. some key objectives: To introduce participants to the fundamental concepts of PLC and Industrial Automation, including the principles, components, and applications. To provide practical, hands-on experience with PLC programming, troubleshooting, and configuring industrial automation systems. To cover industry-specific topics and case studies to ensure participants are familiar with the latest trends, challenges, and advancements in the field. To foster collaboration and teamwork among participants through group projects and interactive sessions, simulating real-world industrial scenarios.
Venue	PLC and Factory Automation Lab.
No. of Beneficiaries	32 Students

Course Content:

Introduction to PLC and Industrial Automation:

Overview of PLCs and their role in industrial automation

Introduction to automation systems and their applications

Basic Electrical and Electronics Concepts:

Review of fundamental electrical and electronic principles relevant to PLCs.

Understanding sensors, actuators, and control systems.

PLC Fundamentals:

In-depth exploration of PLC architecture and components

Understanding ladder logic programming

Hands-on PLC Programming:

Practical exercises for programming PLCs using industry-standard software

Troubleshooting and debugging PLC programs

Industrial Communication Protocols:

Overview of communication protocols such as Modbus, Profibus, and Ethernet/IP

Practical applications of communication protocols in industrial settings

Human-Machine Interface (HMI):

Introduction to HMI systems and their integration with PLCs

Hands-on experience in designing and implementing HMIs

Program Overview:

The PLC & Industrial Automation training program, led by industry experts Mr. Sarang Thakare and Mr. Samir Chaure from Prolific Systems and Tech Pvt. Ltd, Nagpur, provided a comprehensive learning experience for electrical engineering students. Spanning duration of 48 hours , the program seamlessly integrated theoretical sessions with hands-on exercises, ensuring participants gained practical skills in Programmable Logic Controllers (PLC) and Industrial Automation. The trainers, with their expertise, delivered engaging content, covering fundamental concepts and addressing current industry trends and challenges. The program emphasized collaboration through group projects, enabling participants to apply their knowledge to real-world scenarios and fostering teamwork

Learning Outcomes:

Students gained hands-on expertise, making them industry-ready.

Successful participants received certifications, validating their skills.

Students gained a thorough understanding of industrial automation systems, encompassing sensors, actuators, communication protocols, and human-machine interfaces.

Participants gained insights into current industry trends and emerging technologies in the field of industrial automation, ensuring they stay abreast of advancements.
