About Program:

Aptitude tests are often used to assess academic potential or career suitability and may be used to assess either mental or physical talent in a variety of domains.

There are various topics under the syllabus of Quantitative Aptitude. Topics such as work and wages, permutation and combination, profit and loss, age, probability, percentages, ratios and many more. The above article contains all these important topics.

In general, aptitude tests measure one's competence in logical reasoning, numerical skills, or verbal ability; competency can be evaluated through problem-solving tasks and testing one's critical thinking across various contexts.

Topics Covered:

Permutations & Combinations, Probability, Simplification, Surds, Indices, Progression, data interpretation, Data Sufficiency, Non Verbal series, Analogs, Pattern, Water and Mirror image, Square root, cube roots, Ratio proportions, partnerships, Averages, Allegation's & Mixtures, Questions on Ages, Number Series & Letter Series, Coding, decoding, calendars.

Learning Outcomes:

After successful completion of this course, students will have the knowledge and skills to

1. Solve the problems easily by using Short-cut method with time management which will be helpful to them to clear the competitive exams for better job opportunity.
2. Analyze the Problems logically and approach the problems in a different manner.

About Program:

Fear, anxiety, and panic are all common emotions that can be experienced in life. Fear can be triggered by a particular situation, such as public speaking or a job interview. Anxiety can be a result of a high-stakes situation or an impending deadline. And panic can arise when life feels overwhelming or out of control.

However, fear, anxiety, and panic can all be managed and even overcome with the right strategies and techniques. In this article, we'll explore various ways to help you conquer these emotions and gain control of your life.

The first step in overcoming fear, anxiety, and panic is to gain a better understanding of these emotions. By knowing what triggers them and recognizing the signs, you can start to take control of the situation. Fear is usually triggered by a specific event or situation, and you can feel it in the form of physical symptoms such as sweating, shaking, and a racing heart.

Anxiety is usually caused by a sense of uncertainty and can manifest as feelings of dread or nervousness. Panic is a more intense emotion that can be caused by feelings of being overwhelmed and out of control.

About Program:

Public speaking, also called oratory or oration, has traditionally been defined as speaking in person to a live audience. Today, the term can also refer to speaking to an audience through digital technology. Public speaking is important for developing leadership abilities because it helps you convey your ideas effectively to others. The ability to persuade others and help them change their minds is essential for becoming an effective leader.

Group discussion (GD) is a comprehensive technique to judge the suitability of an individual and his appropriateness for admission, scholarship, job, etc. GD assesses the overall personality – thoughts, feelings and behaviour - of an individual in a group. A topic is presented to the group members for discussion.

A group discussion tests the teamwork and Communication Skill of candidates. A group discussion involves a discussion on a given topic with other candidates, usually with similar experience and educational qualifications. Performing well in a group discussion helps you to get noticed and practicing for one improves your public speaking skills. In this article, we will review what a group discussion is, its importance in the selection process, the skills evaluated during a group discussion and how to perform well in this round.

Do's of GD: Listen to other participants, maintain eye contacts with other participants, Give others time to peak, keep potential disagreement polite, Dress professionally, support your claim, welcome arguments, prepare for discussion, acknowledge others before speaking, initiate the conversation, plan your entry point, plan your exit point, take notes, ask for clarification, show confidence.

Don'ts of GD: Enter the conversation quickly, Over speak, Speak about other topics, Repeat other participants, Speak or gesture boldly, Interrupt others, Bring irrelevant or false statistics, Appear insecure, Share information that isn't valuable, Have negative body language, Share participant's space, Make eye contact with the evaluators, Focus on only one participant, Use judgmental language, Worry if the topic is unfamiliar.

About Program:

Self-awareness is your ability to perceive and understand the things that make you who you are as an individual, including your personality, actions, values, beliefs, emotions, and thoughts. Essentially, it is a psychological state in which the self becomes the focus of attention.

Self-esteem is how we value and perceive ourselves. It's based on our opinions and beliefs about ourselves, which can feel difficult to change. We might also think of this as self-confidence. Self-esteem is confidence in one's own worth, abilities, or morals. Self-esteem encompasses beliefs about oneself as well as emotional states.

Public speaking, also called oratory or oration, has traditionally been defined as speaking in person to a live audience. Today, the term can also refer to speaking to an audience through digital technology. Public speaking is important for developing leadership abilities because it helps you convey your ideas effectively to others. The ability to persuade others and help them change their minds is essential for becoming an effective leader.

Having strong communication skills aids in all aspects of life – from professional life to personal life and everything that falls in between. From a business standpoint, all transactions result from communication. Good communication skills are essential to allow others and yourself to understand information more accurately and quickly.

Schedule of Activity	30th August to 03th September 2019.
Duration	30 Hours
Objective of Activity	<p>The primary objective of the training program was to provide participants with a deep understanding of industrial electronics, covering principles, components, and applications in real-world industrial settings.</p> <p>some key objectives:</p> <ul style="list-style-type: none"> To equip participants with hands-on experience in Arduino programming, focusing on its applications in industrial contexts. To provide practical, hands-on experience with PLC programming, troubleshooting, and configuring industrial automation systems. To cover industry-specific topics and case studies to ensure participants are familiar with the latest trends, challenges, and advancements in the field. To foster collaboration and teamwork among participants through group projects and interactive sessions, simulating real-world industrial scenarios.
Venue	A2 Class Room (Electrical Engineering Department)
No. of Beneficiaries	48 Students

Course Content:

Introduction to Industrial Electronics

Overview and importance in automation

Basic principles and components

Arduino Programming Fundamentals

Introduction to Arduino platform

IDE and programming basics

Input/Output handling with Arduino

Applications of Electronics in Industry

Hands-on Arduino Projects

Team formation and project assignments

Collaboration techniques in industrial settings

Project management in electronics

Safety Protocols in Industrial Electronics

Program Overview:

The Industrial Approach in Electronics and Arduino Programming training program, conducted by Mr. Sanjay Chaudhari, Managing Director of Electronics Study Center Nashik, aimed to provide electrical engineering students with a comprehensive understanding of industrial electronics and practical skills in Arduino programming.

The program, spanning [duration], featured a well-balanced curriculum with theoretical sessions, hands-on projects, and collaborative learning activities. Participants delved into industrial electronics principles, Arduino programming, and applied their knowledge through practical projects

Learning Outcomes:

Students gained proficiency in industrial electronics and Arduino programming, enhancing their ability to contribute to industrial projects.

Application of theoretical knowledge in real-world industrial scenarios through hands-on projects and simulations

Students gained a thorough understanding of working of electronics components

Increased awareness of safety protocols and standards in industrial electronics, ensuring responsible and secure practices

Name of the Resourse Person : Mr. Sanjay Chaudhari Sir
(Managing director Electronics Study Center Nashik)

Workshop Duration : 30th Aug to 03 Sept 2019

Time: 09:00 am to 05:00 pm (For All five days)

Venue: Electrical Engineering Department, A4 Class Room

Target Group : All Electrical Engineering Students.

Program Outcomes attained through this Workshop: P0-5, PO-9,PO-11

Resourse Person has focused on following issues:

To make students aware about various types of Electronics components and Arduino programing applications.

Session was concluded with vote of thanks.

Title of Activity	Training on AutoCAD Software
Speaker	Mr. Vijay Kumar Bhambri, Nagpur
Organizer	Mechanical Engineering Department
Schedule of Activity	27-07-2019 to 10-08-2019
Duration	35 Hours
Objective of Activity	<p>Primary objective of The Training on AutoCAD Software, is to familiarize mechanical engineering students with the basics of AutoCAD software, including its interface, tools, and functionalities.</p> <p>some key objectives:</p> <p>To develop proficiency in 2D drafting, enabling students to create precise and detailed technical drawings using AutoCAD..</p> <p>To introduce students to 3D modeling techniques, allowing them to create three-dimensional representations of mechanical components and assemblies.</p> <p>To provide practical insights into the application of AutoCAD in mechanical design, emphasizing industry-relevant practices and standards.</p> <p>To explore collaborative design features within AutoCAD, emphasizing teamwork and effective communication in the design process.</p>
Venue	CAD/CAM Lab
No. of Beneficiaries	24 Students

Course Content:

The course covered the following key topics:

Course Content: AutoCAD Software Training

Module 1: Introduction to AutoCAD

Overview of AutoCAD software
User interface and navigation
Basic commands and tools

Module 2: 2D Drafting and Design

Creating and editing 2D geometries
Precision drafting techniques
Layers and annotations

Module 3: 3D Modeling Techniques

Introduction to 3D modeling
Creating 3D objects and surfaces
Extrusion, revolves, and sweep commands

Module 4: Application in Mechanical Design

Practical application of AutoCAD in mechanical design
Industry standards and practices
Case studies on real-world mechanical design projects

Program Overview:

The AutoCAD training conducted by Mr. Vijay Kumar Bhambri in Nagpur aimed to equip mechanical engineering students with essential skills in computer-aided design.

Mr. Vijay Kumar Bhambri, the facilitator of the AutoCAD Software Training Program, implemented a dynamic and comprehensive teaching approach. Through a series of engaging lectures, he adeptly conveyed theoretical knowledge; ensuring participants grasped the fundamental concepts of AutoCAD. The inclusion of practical sessions provided a hands-on learning experience, allowing students to apply theoretical understanding to real-world scenarios. To reinforce learning, Mr. Bhambri incorporated assignments, challenging participants to solidify their grasp of AutoCAD concepts and techniques. Furthermore, the program featured project work, offering participants the opportunity to synthesize their acquired skills and showcase their proficiency in practical design scenarios. This multifaceted teaching methodology fostered a well-rounded understanding of AutoCAD, preparing participants for effective application in the field of mechanical design.

Learning Outcomes:

Students demonstrated proficiency in using AutoCAD for 2D drafting and 3D modeling.

Students gained practical insights into applying AutoCAD in mechanical design, understanding industry standards and practices.

Students gained the basic understanding and application of analysis and simulation tools within using AutoCAD.

Participants in the Microsoft Excel course have completed a comprehensive 30-hour training program. They have gained a strong foundation in Excel basics, advanced data manipulation techniques, data analysis, and advanced functions. Additionally, they have learned to create charts, graphs, and pivot tables, design dashboards, and work with macros and VBA for automation. The course concluded with a project presentation and assessment to ensure a deep understanding of the topics covered.

This course has been conducted successfully by Prof. S. M. Mishra, an internal resource person from the Department of Business Administration and Research. The participants have acquired valuable skills that will enhance their proficiency in Microsoft Excel, allowing them to apply their knowledge in various academic and professional settings.

Certifications were be awarded to participants upon successful completion of the course

Case/Project used for assessment/final project:

Case 1:

Case Study: Grade Calculator

Background:

You want to create a simple Excel spreadsheet to calculate your grades for a class. You'll input your scores for various assignments, and the spreadsheet will calculate your final grade based on a pre-defined grading scale.

Tasks:

Data Entry (Topics: Data Entry and Formatting):

Create a new worksheet and label it "Grade Calculator."

Set up columns for Assignment Name, Points Earned, and Total Points Possible.

Input the names of assignments or exams in the Assignment Name column.

Basic Calculations (Topics: Basic Formulas and Functions):

In the Points Earned column, enter the scores you received for each assignment.

In the Total Points Possible column, enter the maximum possible scores for each assignment.

Calculate Percentages (Topics: Basic Formulas and Functions):

In a new column, calculate the percentage for each assignment using the formula **(Points Earned / Total Points Possible) * 100**.

Final Grade Calculation (Topics: Basic Formulas and Functions):

Calculate your final grade based on the following grading scale:

A: 90-100

B: 80-89

C: 70-79

D: 60-69

F: 0-59

Use an IF statement to determine your final grade based on your calculated percentage.

Data Validation (Topics: Data Validation and Error Handling):

Use data validation to ensure that the Points Earned and Total Points Possible columns only accept numeric values.

Report (Topics: Workbook Protection and Security):

Add a simple header with your name and course details to the worksheet.

Protect the worksheet to prevent unauthorized changes.

Assessment:

You will be assessed on your ability to create a functional grade calculator in Excel. The assessment will focus on the accuracy of the calculations, your proficiency in basic Excel functions, and the presentation of the final grade.

Case 2:

Case Study: Travel Itinerary and Expense Tracker

Your Upcoming Adventure

Introduction:

You're about to embark on an exciting international adventure, and you want to create a dynamic travel itinerary and expense tracker using Excel. This will help you plan your trip, keep track of your activities, and monitor your expenses on the go.

Tasks:

Travel Itinerary (Topics: Data Entry and Formatting):

Create a new worksheet titled "Travel Itinerary."

Set up columns for Date, Destination, Activity, Time, and Notes.

Fill in the itinerary with details of your daily activities during your trip, including the date, destination, planned activity, time, and any additional notes.

Highlighting Special Events (Topics: Conditional Formatting):

Use conditional formatting to highlight special events or unique activities during your trip. For example, highlight the day of a special festival or celebration in a different color.

Interactive Map (Topics: Charts and Graphs):

Create an interactive map of your destinations using an online map tool or by inserting a map image. Pinpoint each destination on the map, and hyperlink the destinations to their corresponding details in the itinerary.

Expense Tracker (Topics: Data Validation and Error Handling):

Create a new worksheet titled "Expense Tracker."

Set up columns for Date, Expense Category, Expense Description, Amount, and Payment Method.

Enter details of your expenses during the trip, including the date, expense category, description, amount, and payment method.

Expense Summary (Topics: Charts and Graphs):

Create a bar chart to visualize your expenses by category. Each category will represent a bar, and the height of the bar will indicate the total expense for that category.

Daily Expense Summary (Topics: Pivot Tables and Pivot Charts):

Use a pivot table to create a daily expense summary. This table will show the total expenses for each day, allowing you to monitor your daily spending.

Personal Travel Diary (Topics: Workbook Protection and Security):

Keep a personal travel diary by adding a new worksheet for each day. You can write about your experiences, memories, and reflections. Protect this diary worksheet with a password for privacy.

Item Search (Topics: Advanced Functions and Formulas):

Create a search feature that allows you to find specific items (activities or expenses) within your itinerary or expense tracker based on keywords.

Assessment:

You will be assessed on your ability to create an engaging and functional travel itinerary and expense tracker. The assessment will focus on the organization of your trip details, the accuracy of data entry, proficiency in Excel functions, the quality of interactive features, and the overall presentation.

Akshaykumar Bhole

has successfully completed the online, non-credit Professional Certificate

IBM Data Science

In this Professional Certificate learners developed and honed hands-on skills in Data Science and Machine Learning. Learners started with an orientation of Data Science and its Methodology, became familiar and used a variety of data science tools, learned Python and SQL, performed Data Visualization and Analysis, and created Machine Learning models. In the process they completed several labs and assignments on the cloud including a Capstone Project at the end to apply and demonstrate their knowledge and skills.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
