PROGRAM SUMMARY

On 25th sept, the ISTE committee conducted a program on the topic of 'Skill development program on PLM', where our guest speaker Dipak Kate told us about PLM (Product Lifecycle Management).

It all started with the inauguration of our guest and was followed on by a discussion of the topic that what exactly PLM is. Certain things were made clear like PLM Grid, PDM, ERP, CAD, and DM.

Our speaker also explained that how PLM tends to cover or touch everything a company does related to its product, and how PLM has an interaction with other applications. The speaker further elaborated the paradigm shift, typical causes of problems without PLM and how it is connected with the other technology.

Further, we were informed about the Windchill software that how it manages the complete digital product definition.

After this, the event shifted towards a Q&A session where students asked their doubts about various carrier opportunities.

Lastly, the program ended up with a vote of thanks by one of our team members.

Team ISTE.

REPORT OF SKILL DEVELOPMENT PROGRAM

The SSGMCE ACM STUDENT CHAPTER and INFORMATION TECHNOLOGY STUDENT ASSOCIATION (ITSA) successfully organized a one-day Skill Development Program on "Autonomous Vehicles" for engineering students on **13 November 2021, 12:30 PM (IST) to 2.30 PM**. The resource person was Mr. Chaitanya Gore, Former Senior Robotics Engineer at KUKA Robotics and Currently Pursuing Double Master's Degree MS (Intelligent Autonomous Systems), University of Cote d'Azur, France, and KTH Royal Institute of Technology, Sweden. The webinar was totally free of charge. The webinar was on Microsoft Office 365 (Microsoft Teams App). Total 92 students were registered from the different classes of the institute, as per attendance record provided by online platform 84 students attended the session.

Upgrading Cloud Computing Skills

SDP Name:-	Upgrading Cloud Computing Skills		
Dates:-	27.11.2021	No. of hours:-	3
Objectives of SDP		Outcome of SDP	
1	To impart the basic knowledge cloud computing	1	Participants will be able to understand cloud computing fundamentals
2		2	Participants will be able to use cloud computing concepts

Need of SDP:

Now a days, Cloud technology is helping businesses and people weather the ongoing storm caused by the global pandemic. Companies are seizing on cloud as the key enabler to complete their digital transformation, and the COVID pandemic has further accelerated this mandate. Cloud is becoming a top C-suite agenda item as businesses are transitioning from a piece-meal approach to a more holistic end-to-end digital transformation with cloud at its core. The winners of tomorrow will be the ones that navigate this change rapidly, make the right choices and engage with the appropriate partners to augment their own capabilities. So companies are in need of lot of skilled engineers having knowledge of cloud computing. Cloud computing is today's hot cake for engineers.

SDP Poster

Why Cloud Computing?

- Cost
 - | It eliminates the capital expense of buying hardware and software and setting up and running on-site datacenters
- Speed
 - | Vast amounts of computing resources can be provisioned in minutes, typically with just a few mouse clicks, giving businesses a lot of flexibility and taking the pressure off capacity planning.
- Productivity
 - | Removes complexity of datacenter setup and configuration, so that IT teams can spend time on achieving more important business goals.
- Global scale
 - | Ability to scale elastically

Brief about Guest Lecture: -

Department of Information Technology SSGMCE, Shegaon has arranged a guest lecture by Ms. Angana Rajput on Future Scope of Data Science...Discover why it's a promising Career Option.

In the session, the speaker gives a brief introduction about Data Science & AI, As data science is a broad field of study pertaining to data systems and processes, aimed at maintaining data sets and deriving meaning out of them. **Data scientists** use a combination of tools, applications, principles, and algorithms to make sense of random data clusters. Since almost all kinds of organizations today are generating exponential amounts of data around the world, it becomes difficult to monitor and store this data. Data science focuses on data modeling and data warehousing to track the ever-growing data set. The information extracted through data science applications is used to guide business processes and reach organizational goals. Artificial intelligence aims at enabling machines to execute reasoning by replicating human intelligence. Since the main objective of AI processes is to teach machines from experience, feeding the right information and self-correction is crucial. AI experts rely on deep learning and natural language processing to help machines identify patterns and inferences.

Session: 2021-22

POST-EVENT SUMMARY REPORT

Name of Event: Skill Development Program on **CRUD Operations in Database**

Speaker: **M. Faizan I. Khandwani**, *Assistant Professor, Department of Information Technology, SSGMCE, Shegaon.*

Date: **19th March 2022**

Time: **09:30am to 11:30am**

Platform: **Microsoft Teams**

Registrations: **11**

Attendees: **100**

Overview:

This program was aimed at providing comprehensive insights and practical knowledge regarding database management. The session commenced promptly at the scheduled time, leveraging the digital platform of Microsoft Teams to accommodate a substantial audience of 100 attendees. The program aimed to delve into the foundational principles and practical applications of CRUD operations within databases, catering to both novice and intermediate level participants.

M. Faizan I. Khandwani, leveraging his expertise in the field of Information Technology, adeptly navigated through the intricacies of Create, Read, Update, and Delete operations in databases. The session amalgamated theoretical understanding with real-world examples and interactive demonstrations, fostering an engaging and informative learning environment.

Participants were actively engaged through discussions, Q&A sessions, and practical demonstrations, providing them with a holistic understanding of the CRUD operations' significance, implementation, and best practices in database management.

The Skill Development Program on CRUD Operations in Databases concluded as a highly informative and enriching session. Attendees gained valuable insights into database

management fundamentals, empowering them to apply the CRUD operations effectively in their academic pursuits and professional endeavors.

This program aligns with the commitment of SSGMCE, Shegaon, towards fostering practical knowledge and skill enhancement in the field of Information Technology, ensuring that participants are well-equipped with industry-relevant competencies.

SDP Name:-		Shell Scripting Fundamentals	
Dates:-		16.04.2022	No. of hours:- 2.5 Hours
Objectives of SDP		Outcome of SDP	
1	To impart the basic knowledge Unix OS shell scripting	1	Participants will be able to understand Unix OS basics commands
		2	Participants will be able to understand the shell scripting fundamentals
		3	Participants will be able to use UNIX commands and shell scripting

Need of SDP:

This Skill Development Program is designed for beginners to understand the fundamentals to advanced concepts of UNIX commands, UNIX shell scripting, and different tools. Multitasking and multi-user features are supported. UNIX is the most extensively used operating system on all types of computers, including desktops, laptops, and servers. UNIX has a graphical user interface (GUI) that is similar to Windows and allows for easy navigation and support of the environment. It is the foundation of modern technology. UNIX is the foundation of the Internet and a variety of other services such as chat and Netflix. Red Hat, a major Linux distribution, is a UNIX -based operating system having both a command line and a graphical user interface.

SHRI SANT GAJANAN MAHARAJ COLLEGE OF ENGINEERING, SHEGAON
INTRODUCTION TO GRAPHICS DESIGN WITH PHOTOSHOP

Event Title : "Introduction to Graphic Design with Photoshop" 2022

Date: 21 March 2022 to 23 March 2022

Location: Shri Sant Gajanan Maharaj College of Engineering, Shegaon.

Organizing Institute: Students Activities Committee, IEEE Bombay Section

Workshop Facilitators: IEEE team, SSGMCE.

Number of Participants: 26 Student

Workshop Objectives:

1. **Software Familiarity:** Introduce participants to Adobe Photoshop's interface, tools, and basic functions to build their comfort level with the software.
2. **Fundamental Concepts:** Explain key graphic design principles like color theory, typography, composition, and visual hierarchy.
3. **Image Manipulation:** Teach participants how to edit and enhance images using Photoshop's tools, filters, and adjustments.
4. **Graphic Creation:** Guide participants in creating simple graphics, logos, and designs from scratch, using various techniques and layers.
5. **Text Effects:** Show how to apply creative text effects, such as blending modes, layer styles, and typography effects.
6. **Digital Artistry:** Introduce participants to the concept of digital art and guide them in creating digital paintings or illustrations.

Overview of the program:

The "Introduction to Graphic Design with Photoshop" workshop, held from March 21st to 23rd, 2022, was a dynamic and informative event coordinated by a dedicated team comprising Mr. Sanket Deshmukh, Mr. Lokesh Chandak, and enthusiastic IEEE volunteers. With an impressive turnout of 26 actively engaged students, this workshop served as an invaluable platform for budding designers.

Participants delved into the world of graphic design, gaining hands-on experience in creating captivating leaflets, eye-catching banners, and professional certificates using Adobe Photoshop. Through a combination of practical exercises, expert guidance, and collaborative learning, attendees honed their design skills and discovered the power of visual communication.

The workshop not only fostered creativity but also encouraged networking and skill-sharing among participants. It was a testament to the commitment of both the organizers and students towards embracing the art of graphic design. This event undoubtedly left its mark as an enriching educational experience for all involved, paving the way for future design endeavors and innovations.

It was a three-day workshop in which the students learned to use different tools of Photoshop. At the end of the third day, a competition of designing a certificate was held among the participants so as to see how much the students learned to use different tools of Photoshop. The winner of this competition was presented goodies from IEEE.

This was two days Event of total 4 hours. The orienteer of the Event was Mr. Yash Deshmukh along with the co-ordination of other team members of ESSA. Followed by Pursuit Inauguration ceremony Event was conducted at 1 pm to 3 pm on day 1 and 11.30 am to 1.30 pm on day 2. The rounds of the events as :

Round 1: This round will be based on basic Electrical/Electronics quiz questions (aptitude test). The aptitude test will be on Google forms. The team with less number of marks will be disqualified.

Round 2: In this round, there will be the fastest finger round take place and from that, the participants will be selected for the hot seat of KBCK (Kon Banega Circuit King). In KBCK there will be MCQ type questioning related to electronics and the rules are similar to KBC.

Round 3: In the round, you have to solve problem statement given by us. You have to draw circuit as per problem statement. This round is to test your practical knowledge.

In this Event students enjoyed a lot. And we shortlisted the winner team as team of Vaishnavi Asole and Shruti Patil who won the prize of Rs. 2000 and runner-up team was Vaishnavi Gawande and Rohini Dawale who won the prize of Rs. 1000. The winner and runner team was felicitated at new auditorium in Pursuit's certification ceremony.

Activity Report 2021-2022

Shri Sant Gajanan Maharaj College Of Engineering

Name of Workshop: Multisim/PCB designing

Date of Workshop: 25th and 26th March, 2022

Location of Workshop: DSP Lab, EXTC Dept. SSGMCE, Shegaon.

Number of Entries: 24 students.

Fees of the Workshop : Rs 50/-

Conducting Committee: Electronic Students and Association (ESSA) .

An informative workshop “**Multisim/PCB designing**” was conducted by ESSA committee on the occasion of Pursuit-2022 . This workshop was conducted under the guidance of Prof. K. S. Vyas [Thanvi] .(Faculty Advisor of ESSA) as well as Prof. S. P. Badar (Chief coordinator, Pursuit). With regards of Dr. S. B. Somani (Principal), Dr. M.N. Tibdewal (HOD of EXTC), Prof. K. S. Vyas, Prof. S. P. Badar and the student coordinator of the workshop was Ms. Vaishnavi Rakhode (Publicity Head, ESSA).

This was two days workshop of total 4 hours . The resources of the workshop were Mr. Lokesh Hiwarkar, Ms. Shwetatai Bhagat , Mr. Bhushan Hajare and the orienteer of the workshop were Mr. Prathamesh Gattani , Ms. Dipali Agrawal and Kartik Shingade. Followed by Pursuit Inauguration ceremony workshop was conducted at 4.30 pm to 6.30pm on day 1 and 2 pm to 4 pm on day 2.

In this workshop students learned how to use Multisim Software and what are its benefits in electronics and also basics about PCB Designing . As Multisim software integrates industry-standard SPICE simulation with an interactive schematic environment to instantly visualize and analyze electronic circuit behavior . Its intuitive interface helps educators reinforce circuit behavior . Its intuitive interface helps educators reinforce circuit theory and improve retention of theory throughout the engineering curriculum . By adding powerful circuit simulation and analyses to the design flow . Multisim helps researchers and designers reduce printed circuit board (PCB) prototype iterations and save development costs.

In this workshop student learnt a lot and enjoyed too. As using the Multisim software and dealing with PCBs is very important in Electronics engineering this event was conducted also we gave students study material for revision and also installed the software in their own devices. By clearing all the queries of the students about Multisim and PCB designing the workshop was concluded.

Respected Sir,

We team ESSA (2021-2022) wish to conduct workshop on basic electronics named as "Electro- Metro". It will be held on 11th, 12th and 13th March 2022 for all 1st year and 2nd year EXTC Students.

It is a three day workshop with duration of 18 hrs (6 hrs per day). This workshop will be conducted by Mr. Sanjay Satul (Lab. Assistant), Mr. Saleem Ahmad (Lab Assistant) and Bhushan Hajare (Technical Head, ESSA) with charges 400rs each group. We will provide them take away kits of components to perform live hands on training. After successful completion of workshop we will provide hard copy of certificate to each participant.

Day 1 (11/03/2022)

Inauguration.

Session by Mr. Sanjay Satul .

Session by Mr. Saleem Ahmad.

Day 2 (12/03/2022)

Phase 1 :- Training of Breadboard.

Phase 2 :- Training of PCB soldering.

Day 3 (13/03/2022)

Project 1 :- Dark Sensor using IC NE555 and LDR .

Project 2 :- Voltage regulation using IC 7805.

Project 3 :- Led chaser using IC NE555 .

Thank you for your consideration and waiting for your response positively.

Overview of the program:

IEEE Students' Branch has hosted "Robovision" - a two - day workshop organized by Student Activities Committee, IEEE Bombay Section on 12th and 13th March 2022 for first year and second year students. In total, 48 students actively participated in the mention workshop.

On 12-March 2022, Dr. S.B. Somani, Principal of SSGMCE Shegaon, graced the session as the guest speaker. The event commenced with a warm welcome by Mr. Pravin Wankhede , by honoring him with a memento and a shawl as a token of respect. With the stage set, his address commenced with a motivating tone, aimed at steering the students towards their upcoming engineering journey.

Drawing from his personal experiences, he shared a simple yet powerful approach: strengthening your mental capacity to handle college challenges and nurturing valuable friendships to build a strong social foundation. He expressively shared anecdotes from his college days, highlighting the pivotal role that friendships, engagement in sports, and a dedicated pursuit of education played in molding his own confidence and outlook.

With a keen understanding of the fast-paced changes in the robotics and technological landscape, he highlighted the important factor and the need to stay updated with evolving technologies and trends. Drawing from real-world examples, he illustrated how technology has become essential.

Emphasizing the symbiotic relationship between progress and a strong engineering foundation, he provided a threefold framework for innovative idea development: hyper-personalization, innovation, and operability. These principles encapsulated personal growth strategies. Concluding on a metaphorical note, he likened students to butterflies, urging them to extract wisdom and experiences like nectar, which could then be transformed into the valuable contributions.

In a thought-provoking revelation, he asserted that the essence of success was rooted 70% in communication, knowledge, and behavioral skills, with the remaining 30% relying on technical proficiency. His wise advice on presenting oneself as a key facet of successful leadership echoed the timeless principle that first impressions matter significantly. With a paternalistic tone, he advised students to introspect their potential, adopt a minimalist lifestyle, and actively avoid negative influences, all of which he deemed crucial for emerging as confident winners in both professional and personal spheres.

After that, the workshop started with the introduction of the event by Prof. Pravin Wankhede. There were total 48 participants from first year and second year benefitted through this workshop. The participants are able to understand basics of robotics, robot components, embedded C programming and robot application development. Then some refreshments were provided to participants. After that, some practices were done by participants.

On 13th March 2022 the session commenced with the warm welcome of , Prof. Pravin Wankhede. The gesture was accompanied by honouring him with a shawl and a memento as tokens of respect, setting a gracious tone for the event. The proceedings began with a respectful mention of Shri Sant Gajanan Maharaj. In his introduction, he walked the audience through his career journey and trajectory. He shared his personal path and highlighted his aspirations.

After that, the remaining part of the workshop was delivered by Dr. Pravin Wankhede. Many more hands on practices were done by participants. Other co-ordinates helped participants who had some queries and had been solved. Refreshment was provided. Then the feedback session started. Some feedback was taken from participants. The student participants showed their interest and active participation in the two - day workshop and appreciated the management for holding such an amazing event. The vote of thanks has been delivered .

As the workshop session concluded, the participants were left with a profound sense of purpose and a renewed outlook on their potential as future engineers with the new skill. His journey illuminated the path, guiding them towards recognizing opportunities, honing skills, and embracing the spirit of innovation.

SSGMCE Students' Branch

Overview of the program:

IEEE Student Branch SSGMCE, Shegaon has organized the 'Introduction to Microcontroller and Interfacing with Sensors' Workshop for the students on 26th March 2022. In total, 28 students actively participated in the mention workshop.

Our aim was to make the workshop completely hands on-one and explain the theory through practical. We did this because it is our firm belief that no concept can be understood by reading/listening alone; the only way to understand anything completely is by practically doing things and experiencing it. We wanted to start from scratch so that their base/foundation become strong and thus give them a platform to build their knowledge.

The first step for the hands-on workshop was to give them their own kits. For this, we assembled a kit containing all the required components.

We started the workshop with simple examples such as blinking an LED, PWM (pulse-width modulation) then slowly moved up-to interfacing buttons, potentiometers, transistors, motors and ended the workshop with interfacing an ultrasonic distance sensor.

We first explained the concepts, circuit diagram and code to everyone and then using the kits they wrote the code and executed the project on their own.

Along the way, we showed them our projects to make them understand the application of what they were learning. This gave them a practical application understanding of the concepts that they had learned.

Overview of the program:

IEEE students branch and Robotics and Automation Society Chapter organized a fund-raising event called “IPL Auction” on 20th February, 2022. In the Electronics and Telecommunication Department Seminar Hall. The IPL Auction was a fund raising event aimed at undergraduate students and teams.

In this college-level IPL auction program, there were 36 participants organized into groups of 4. Each group was allocated a specific budget for the auction of players. The players were categorized into marquee and normal players, with marquee players having higher ratings.

The objective of the auction was to assemble the highest-rated team of 11 players while staying within the budget constraints. Participants had to strategically allocate their budget to acquire marquee and normal players, considering their ratings and value to build a competitive team. The challenge was to maximize the overall team rating within the budgetary limits.

The event coordination is done by Mr.Ashutosh Bhelonde and Mr.Yash Kulthe. The team Ritanshu Khatke was the winning team. The winning team took home a cash prize and a certificate.

Overview of the program:

IEEE Students' Branch has hosted a "Chasing Calsi" workshop organized by the Student Activities Committee on 09th January 2022 for first year students. Total of 180 students actively participated in the mention workshop.

On 09th January 2022, Dr. S.B. Somani, Principal of SSGMCE Shegaon, graced the session as the guest speaker. The event commenced with a warm welcome by Dr. P. R. Wankhede, by honoring him with a flower. With the stage set, Dr. S. B. Somani address commenced with a motivating tone, aimed at steering the students towards their upcoming engineering journey.

Emphasizing the symbiotic relationship between progress and a strong engineering foundation, he provided a threefold framework for innovative idea development: hyper-personalizing, innovation, and operability. These principles encapsulated personal growth strategies. Concluding on a metaphorical note, he likened students to butterflies, urging them to extract wisdom and experiences like nectar, which could then be transformed into valuable contributions.

His wise advice on presenting oneself as a key facet of successful leadership echoed the timeless principle that first impressions matter significantly. With a paternalistic tone, he advised students to introspect their potential, adopt a minimalist lifestyle, and actively avoid negative influences, all of which he deemed crucial for emerging as confident winners in both professional and personal spheres. He affirmed that engineers possess a wealth of skills, including effective problem-solving abilities and versatile skill sets. He emphasized that engineers play a vital role as innovators, shaping the future with their creations. The proceedings began with a respectful mention of Shri Sant Gajanan Maharaj.

After that, the workshop started by the introduction of the event by Dr. P. R. Wankhede. There were a total of 84 participants from the first year who benefited from this workshop. The participants are able to understand the basics of a scientific calculator. After that, some practices were done by participants. Other co-ordinates helped participants who had some queries and had been solved. Refreshment was provided. Then the feedback session started. Some feedback was taken from participants. The student participants showed their interest and active participation in

the workshop and appreciated the management for holding such an amazing event. The vote of thanks has been delivered.

As the workshop session concluded, the participants were left with a profound sense of purpose and a renewed outlook on their potential as future engineers with the new skill.

Subject: Permission to organize "Workshop on Scientific Calculator"

Respected Sir,

With reference to above subject, we wish to "One Day Workshop on Scientific Calculator" on 17th December 2022 (9.00am to 12.00noon) under IEEE Students Branch for the benefit of first year engineering students. Under the workshop we will impart a hands-on knowledge on using Scientific Calculator for engineering calculations. Registration fee for the workshop is Rs.30. The registration fee included tea, breakfast and certificate in softcopy.

We kindly seek your permission.

Thanking you.

Subject: Permission to conduct Two Days workshop on "CMOS Digital Design using Microwind"

Respected Sir,

Electronics & Telecommunication Department wish to organize Two Days workshop on "CMOS Digital Design using Microwind" for EXTC students on 3rd and 4th December 2022. We hope this workshop will help students to get basic knowledge of VLSI design & simulation of Circuits on MICROWIND software.

The detail about training course is as follow:

Workshop Name	Fees	Dates	Targeted Students
"CMOS Digital Design using Microwind"	Rs 300/- per student	3 rd and 4 th December 2022.	All EXTC students

We request you to permit us for the conduction of this workshop.

Thanking you,

Yours Faithfully,

Two Days Hands-on Workshop on
CMOS Digital Circuit Design
3rd - 4th December 2022

Workshop Objectives:

The main objective of the Two Days Hands-on Workshop on CMOS Digital Circuit Design is to provide participants with a comprehensive understanding of CMOS design and its implementation using Microwind software. The workshop aims to enable participants to acquire practical skills in CMOS design and simulation, thereby preparing them for future research and industry projects.

Specific objectives of the workshop include:

1. **Understanding CMOS Principles:** Familiarize participants with the fundamental principles of CMOS (Complementary Metal-Oxide-Semiconductor) technology and its diverse applications in digital circuits.
2. **Hands-on Training with Microwind:** Provide practical, hands-on training in utilizing Microwind software for the design and simulation of digital circuits.
3. **MOSFET Characteristics:** Educate participants on the characteristics of Metal-Oxide-Semiconductor Field-Effect Transistors (MOSFETs) and how to effectively incorporate them into digital circuit designs.
4. **Design and Simulate Digital Circuits:** Enable participants to design and simulate a range of digital circuits, including inverters, NAND gates, and Combinational Logic Designs, utilizing CMOS technology and relevant software tools.
5. **Enhance Layout Design Skills:** Enhance participants' abilities in the creation of efficient and practical layouts for digital circuits.
6. **Performance Analysis and Optimization:** Equip participants with the skills to analyze the performance of digital circuits using simulation tools, and empower them to make data-driven improvements to circuit designs based on their analyses.

Workshop Outcomes:

After successful completion of the Two Days Hands-on Workshop on CMOS Digital Circuit Design, participants will be able to:

1. To acquire a comprehensive understanding of CMOS technology and its practical applications in digital circuits.
2. To explain the characteristics of MOSFETs and their relevance in digital circuit design.
3. To have the capability to effectively use Microwind software to both design and simulate various digital circuits, including inverters, NAND gates, and Combinational Logic Designs.
4. To demonstrate proficiency in designing and simulating digital circuits using CMOS technology and Microwind software.
5. To enhance their skills in creating improved layout designs for digital circuits, focusing on functionality and efficiency.
6. To develop the ability to analyze the performance of digital circuits using simulation tools and makes informed improvements based on their analysis.

Two Days Hands-on Workshop on
CMOS Digital Circuit Design
3rd - 4th December 2022

Workshop Summary Report

The Department of Electronics and Telecommunication Engineering at Shri Sant Gajanan Maharaj College of Engineering, Shegaon, organized a Two Days Hands-on Workshop on CMOS Digital Circuit Design. The workshop was held on 3rd - 4th December 2022 and was attended by a total of 32 participants from the institute.

The main objective of the workshop was to provide participants with a comprehensive understanding of CMOS design and its implementation using Microwind tools. The workshop was conducted by Mr. S. P. Badar, faculty, E & TC Dept., who provided theoretical as well as hands-on training on various aspects of the topic.

The workshop commenced with an introduction to CMOS technology and its applications. This was followed by a detailed discussion on MOSFET characteristics, basic digital circuits, and logic gates. Participants were then introduced to Microwind, widely-used software for designing and simulating CMOS circuits. In the subsequent sessions, participants were guided on the use of Cadence Virtuoso for designing various digital circuits, such as inverters, NAND gates, and other combinational logic design. They were also given hands-on training on designing layouts, simulating circuits, and analysing the results.

The feedback from the participants was overwhelmingly positive, with many expressing their appreciation for the practical knowledge gained during the workshop. The workshop was also praised for the organization and arrangements made by the Department of Electronics and Telecommunication Engineering.

In conclusion, the Two Days Hands-on Workshop on CMOS Digital Circuit Design using Microwind was a great success in providing participants with a solid understanding of CMOS design and its implementation using Microwind tools. It is hoped that such workshops will be organized in the future to provide participants with the opportunity to gain practical knowledge in their respective fields.

Subject: Permission to conduct a three days' hands-on workshop on "Verilog Hardware Description Language"

Respected Sir,

Electronics & Telecommunication Department wish to organize a three days' hands-on workshop on "Verilog Hardware Description Language" for EXTC students during 25th - 27th February 2022 (1st Batch) and 4th - 6th March (2nd Batch).

We hope this workshop will help students to get basic knowledge of VLSI design & simulation of Circuits on Xilinx software.

The detail about training course is as follows:

Workshop Name	Fees	Dates	Targeted Students	Resource Person
"Verilog Hardware Description Language"	Rs 600/- per student	25 th - 27 th February 2022 (1 st Batch)	All EXTC students	S. P. Badar
		4 th - 6 th March (2 nd Batch)		

We request you to permit us for the conduction of this workshop.

Thanking you,

Yours Faithfully,

S. P. Badar

Subject: Permission to utilize DSP Lab for the conduction of a three days' hands-on workshop on "Verilog Hardware Description Language"

Respected Sir,

As Electronics & Telecommunication Department organized a three days' hands-on workshop on "Verilog Hardware Description Language" for EXTC students during 4th - 6th March. To conduct the hands-on session, we need to utilize DSP Lab.

The details about DSP Lab utilization as:

Date	Time
5 th March 2022	1.00 pm to 7 pm
6 th March 2022	9.00 am to 7 pm

Kindly permit us to use DSP Lab for the conduction of this workshop.

6	Objective of Activity	To make students aware about the new idea generation for new product design.
7	Venue	SGIARC, SSGMCE, Shegaon
8	No. of Beneficiaries	Total- 08

About Program:

An Idea Generation Program through Creative Jugad was one of the event conducted by the student chapter for creating an innovative ideas for new products and design as first step for the entrepreneur skill

Learning Outcomes:

1. Students are made aware to create the new ideas about the new product.
2. Students are enabled to present the ideas and defend the same.

9	Syllabus/Topics	Programming of Arduino, Hardware in Auduino kit

About Program:

The first day of workshop started with an introduction to the IOT, Arduino, and related softwares, later the explaining and practicing of the software were continued. The Arduino learning gained much attention from the students and they enjoyed a lot the learning of software for all the days as well as the doubt solving of the students was also taken in between the sessions. After the end of the 6 days workshop a exhibition was also organized for the presentation of small innovative Arduino related projects and models

Learning Outcomes:

1. Students are made to program the Arduino controller.
2. To connect the different hardware to kit.
3. To create the mobile app.
4. To explore the scope of the IoT enabled technologies
